WORLD PEER CHINA ACTS

WPC1—CHINA ACTS	2
WPC2—CHINA SUMMIT	10

© 2025 GMT Games LLC,
P.O. Box 1308, Hanford, CA 93232
www.GMTGames.com

This China Acts Booklet contains all the charts that you will use to determine the actions of China when called upon to do so in the Turn Sequence, as well as to determine the outcome of Summits between the USA and China.

WPC1 CHINA ACTS

The China Acts Flipbook may seem complex as it presents many possible actions, both optional and required, in a long procedural sequence, but it follows a simple process outlined in this flowchart. To fulfill the China Acts Segments in the Turn Sequence, just follow this basic sequence from beginning to end, following the instructions.

A DETERMINE IF VICTORY & PLAYER AUTO-LOSS

B POSTURE CHANGES & RESULTS

C IMPROVE STRATEGIC CAPABILITES

D ESPIONAGE

E IMPROVE ECONOMY

F CALCULATE NUMBER OF CHINA ACTIONS

G DEPENDENT ACTIONS
5 Possible Actions to do if Conditions are met & China Actions are available

H REMAINING ACTION HIERARCHY
10 Possible Actions to take, in order, to use any Remaining China Actions

A DETERMINE IF VICTORY & PLAYER AUTO-LOSS

HAS CHINA WON THE GAME?

CHINA AUTO VICTORY: Before performing any Actions, total the number of China Influence on the map. **If the total is 15 or more, China has achieved its strategic objective of creating a China-led world order.** ***The game ends immediately in an Auto Loss for the US player.***

IF CHINA HAS NOT WON THE GAME, THEN DID YOU JUST DRAW THE "CHINA ACTS (2)" CRISIS CHIT?

When you draw the China Acts (2) Crisis chit, skip down to the **Remaining Action Hierarchy** and perform two actions:

- Cyber Attacks (make 2 attacks)
- Roll a d10 to select another random action from the 1-10 list of Remaining Actions. If you roll a 1 (Cyber Atttacks), an action China would skip or a result that says it doesn't cost/count as an action, reroll for another action.

IF THE "CHINA ACTS (2)" CRISIS CHIT HAS NOT BEEN DRAWN, BUT YOU ARE USING THIS FLIPBOOK BECAUSE IT IS THE "CHINA ACTS" SEGMENT OF THE TURN SEQUENCE, PLEASE GO TO POSTURE CHANGES & RESULTS BELOW!

B POSTURE CHANGES & RESULTS

BEGIN BY POSSIBLY CHANGING CHINA'S POSTURE & RELATIONSHIP WITH THE US

1. To determine whether China's Posture Changes and further effects of accumulated Tensions, flip all the Tensions counters on China, total their values, and then resolve the first condition that applies:

- If currently at Posture 1, and the sum of the flipped Tensions counters is five or more **and** Relations with the US is 1 or 2, increase China's Posture to 2.
  - **Poor Economy "Look over there!" Impetus:** If China is at Posture 1 and would not otherwise be entitled to increase to Posture 2, but their SOE is 3 or 4, immediately increase them to Posture 2. This represents a government approach of: "Let's get more aggressive abroad to take the peoples' minds off the troubles at home."
- If currently at Posture 2, and the sum of the flipped Tensions counters is 0-1, and Relations with the US is 4 or 5, decrease Posture to Posture 1.
- If currently at Posture 2, and the sum of the flipped counters is 5-9, randomly increase one of China's Conflict Tracks not currently at War by one box.
- If currently at Posture 2, and the sum of the flipped counters is 10+, increase both of China's Conflict Tracks by one box.

2. Based on the sum of the Tensions values above, China's Relationship with the US may be affected, as follows:

- If the sum of the counters is 0-1, place a "Trending Pro-US" counter on the Relations with US track.
- For every increment of five in the sum of the Tensions values, place one "Trending Anti-US" counter on the Relations with the US Track. Remember that on a Trending Track, 2 "Trending Anti-US" counters moves the marker on the Track one box to the left towards a worse relationship. *For example if the sum of the Tensions values is 11, this is equal to two "Trending Anti-US" counters so China's relationship with the US worsens by one box. If the sum was 15, China's relationship with the US would worsen one box and a "Trending Anti-US" counter would be placed. (See "Trending Tracks" in the Governing Manual for more information.)*

3. Then immediately (before you perform any actions) remove all the Tension counters on China and redraw HALF (rounded up) the number of counters you removed and replace them number side down.

C IMPROVE STRATEGIC CAPABILITES

AFTER CHECKING FOR AND, IF NECESSARY, CHANGING CHINA'S POSTURE, THEN
IMPROVE CHINA'S STRATEGIC CAPABILITIES

Increase Strategic Capabilities: Make **two** (if currently at Posture 1) or **three** (if currently at Posture 2) attempts to improve China's Strategic Capabilities according to the priorities below. For each attempt, roll a d10 and add 1 if there are any Sanctions counters on China. A 1-4 result at Posture 1 or a 1-5 result at Posture 2 equals success; increase the current Capability by one box.

Use the following hierarchy to determine which areas you attempt to improve, until you have completed all your allowed improvement attempts:

1. **Areas in which China trails the US by two or more boxes.** Attempt to improve each of those areas once until you are out of attempts or all of those areas have been attempted. If there are more than two/three areas, determine randomly for the two/three attempts.
2. If you have two or more actions left, attempt to increase both **Cyber Warfare** and **Naval Forces**, **Training**, & **Tech**. If only one action remains, choose between them randomly.
3. For any remaining actions, roll a d10 for each action and reference the random number ranges on the Strategic Capabilities Tracks to determine which attempts to make.

NOTE: Multiple attempts may be made to improve a Capability but it may only be improved by **one box total**. Once it is improved, do not roll for it again. For example, you may attempt to improve Cyber Warfare because China trails the US by two or more boxes (step 1 above) and again because you have actions remaining (step 2 above).

D ESPIONAGE

AFTER ATTEMPTING TO IMPROVE CHINA'S STRATEGIC CAPABILITIES. THEN
CONDUCT ESPIONAGE

If China's Relations with the US Track is at 1 or 2 and Posture is 2, they make two Espionage attempts to steal from the US and its allies. Otherwise, they make One Espionage attempt.

For each attempt, apply DRMs (below), and roll a d10:

≤0: **Thwart US Counter-intelligence and Steal Technology** First, if there is a "+2 DRM for Espionage Remainder of Game" counter on China, remove it. Then Roll d10 and refer to the random ranges on the Strategic Capabilities Chart. Increase China's Capability in that area by one box.

1–3: **Steal Technology**. Roll d10 to identify a random Strategic Capability. Increase China's Capability in that area by one box.

4–7: **Steal Military Secrets/War Plans**:

a. If possible, increase the strength of any Adversary in a US War by "2". If not possible, increase the strength of any Adversary in an Ally or US-Supported War by "2".

b. Otherwise, increase China/Japan's relative Strength by one box in China's favor on the Conflict Track (or if not possible, China/India's relative Strength).

8–9: **Failure**. No Effect.

10–11: **Failure exposes China's Cyber/Intel means or methods.** Place a free "DARPA/Rapid Capabilities" counter on the Cyber Warfare Track (if one is available and one is not there already) and a "+2 DRM to Next Espionage" counter on China.

12+: **US Counter-Intelligence identifies major Chinese Cyber Espionage Network on western soil.** Place a "Trending Anti-US" counter on China's Relations with the US Track. Then the US player may either (your choice):

a. **Apprehend/expose the spies, disrupt China's networks, and embarrass China on the world stage**. Remove one China Influence counter from the Asia/Pacific and one from Central/South Asia, place a -1 AP counter on China, and place a "+2 DRM To Next Espionage" counter on China.

OR

b. **Use your counter-intelligence treasure trove to create long-term advantage and feed disinformation to China**. Immediately decrease China's Cyber Warfare Strategic Capability by one box and increase China/Japan Relative Strength by one box in Japan's favor on the Conflict Track. Then place a "+2 DRM for Espionage Remainder of Game" counter on China if one is not there already.

DRMs (+/- 3 Max):

-1/-2 if China's Cyber Warfare Strategic Capability is 1/2+ higher respectively than the US's Cyber Warfare Strategic Capability.

-2 if any US ally relationship is currently "Estranged."

-1 if the US Ally relationship with any ally except India or the Gulf States/SA is not Very Close.

+1/+2: if the US Cyber Warfare Strategic Capability is 1/2+ higher respectively than China's Cyber Warfare Strategic Capability.

+2 if there is a "+2 DRM to Next Espionage" counter on China. (If so, then remove it after you make this roll and before you apply the effects of the roll).

+2 if there is a "+2 DRM for Espionage Remainder of Game" counter on China.

E IMPROVE ECONOMY

AFTER PERFORMING ESPIONAGE,
THEN

ATTEMPT TO IMPROVE CHINA'S ECONOMY

Do not perform if China's SoE is already at 7.

Roll a d10 :

1–5:	Place an "Improving Economy" counter on China.
6–8:	No Change.
9+:	Place a "Worsening Economy" counter on China. The Politburo is not happy. They place extra focus on the internal situation and economic inadequacies. Reduce China Actions by one when calculating number of China Actions below.

DRMs:

+1 if there is a Unilateral Sanctions counter on China

+2 if there is a Multilateral Sanctions counter on China

-1 per China Influence in Asia & Pacific, Central/South Asia, the Middle East, and Africa

-1/-2 if China's Relationship with the US is 4/5, respectively

F CALCULATE NUMBER OF CHINA ACTIONS

AFTER ATTEMPTING TO IMPROVE CHINA'S ECONOMY,
THEN

CALCULATE NUMBER OF CHINA ACTIONS

(USE THESE ACTIONS IN THE FOLLOWING DEPENDENT AND REMAINING ACTION HIERARCHIES)

- China receives a number of actions equal to the current value on their SOE track, **plus one**. This is modified by the value at the bottom of their "Relations with the US" Track.
- Modify that base number for any "+1 APs" or "-1 APs" counters that are currently on China. Then remove those counters from the map.
- If you rolled a 9+ on your earlier Attempt to Improve the China Economy, subtract one the total number of allowed China Actions.

Test Team Suggestion: We've found that tracking the current remaining number of China Actions is easily accomplished by using a die and decrementing the number on the die to represent remaining actions each time you use one.

ONCE YOU HAVE CALCULATED THE NUMBER OF CHINA ACTIONS, PLEASE PERFORM THE DEPENDENT ACTIONS, BEGINNING WITH THE NEXT COLUMN.

G DEPENDENT ACTIONS

5 Possible Actions to do if Conditions are met & Actions are available

Perform each action listed below once, in order, until all China Actions have been used or all actions have been performed.

1. **Terror in Central/South Asia**. If there are 5 total Terror Group levels in the Central/South Asia region, use one China Action to remove one Terror Level from the largest group in the region. (This represents China dealing with internal dissent among ethnic and religious opposition.)
2. **Quell Rising Dissent by Addressing Internal Issues**: Roll a d10 adding 1 if China Posture is 2, and subtracting 1 if China SoE is 6+:

1–4:	China must spend one Action to address massive social and infrastructure costs beyond the scope of the game (smog and environmental issues, internal security, modernizing infrastructures, etc.).
5+:	No effect; this step doesn't cost an action this turn.

3. **Reinforcements**. If China is at War, spend a China Action, then roll a d10 to send reinforcements:

1–3:	Add 2 Strength Points to a random China War.
4–8:	Add 1 Strength Point to a random China War.
9+:	Reinforcements delayed – none this turn.

4. **Remove/Reduce Sanctions on China.** If there are no Sanctions counters on China, skip this action. Otherwise, remove or reduce all Sanctions counters on China as follows:
   - If China's Relationship with the US is 4 or 5, or if at least 6 of the world's 8 regions have at least one Chinese Influence, remove all sanctions counters from China at no cost in China Actions.
   - If China's Relationship with the US is 2 or 3, spend 1 China Action to first remove any Unilateral Sanctions counter, then replace any Multilateral Sanctions counter with a Unilateral Sanctions counter.
   - If China's Relationship with the US is 1, spend 2 China Actions to first remove any Unilateral Sanctions counter, then replace any Multilateral Sanctions counter with a Unilateral Sanctions counter.

   Then, place a Worsening Economy counter on both the China and the US SoE Tracks (to reflect the longer-term effects of economic and commercial disruptions caused by the sanctions).
5. **Extra War Progress Roll?** If China is at War, make a China SoE check (D18) to determine whether you can use a China Action for an extra War Progress roll (WM5). If you pass the check, spend the China Action, then make an immediate War Progress roll for a random China War.

IF YOU HAVE ANY CHINA ACTIONS LEFT, PLEASE GO TO THE NEXT PAGE AND DO AS MUCH OF THE REMAINING ACTION HIERARCHY AS YOU CAN!

IF YOU HAVE NO CHINA ACTIONS LEFT, YOU HAVE COMPLETED THE "CHINA ACTS" SEGMENT. RETURN TO THE TURN SEQUENCE.

H REMAINING ACTION HIERARCHY

10 Possible Actions to take, in order, to use any Remaining China Actions

Perform each action listed below once, in order, until all China Actions have been used or all actions have been performed.

1. Cyber Attacks (1 Action)

Make one attack if at Posture 1 or two attacks if at Posture 2. (If you are performing Cyber Attacks as part of a China Acts (2) Crisis chit activation, make two attacks.) For each attack, roll a d10 to determine target, then another d10 to resolve the attacks on the "Resolve attack" chart:

Determine Target (d10):

1: Target US Economy. (If China's Relationship with US is 4 or 5, treat this result as the "3-6" result, instead.)

a) Success places a "Worsening Economy" counter on the US SoE Track.
b) Major success decreases the SoE by one box and increases US Domestic Crises by one box.

2: Target US Political Cohesion. (If China's Relationship with US is 4 or 5, treat this result as the "7-8" result, instead.)

a) Success decreases Relations with Congress by one box and Bipartisan Cooperation by one box.
b) Major Success decreases Relations with Congress by one box and Bipartisan Cooperation by one box, and you must also randomly discard one Congressional Friend. If no such Friend exists, instead decrease Cabinet Effectiveness by one box and decrease public approval by two boxes.

3–6: Discredit and Replace US as Major Trade Partner in Asia/Pacific.

a) Success adds one China Influence to Asia/Pacific.
b) Major Success adds one China Influence to Asia/Pacific, places a "Trending Anti-US" counter in Asia/Pacific, and increases Regional Crises in Asia/Pacific by one box.

7–8: Target India.

a) Success increases the Regional Crises in Central/South Asia by one box.
b) Major Success increases the Regional Crises in Central/South Asia by one box, and decreases US/India Ally Relationship by one level, and places a -1 AP counter on India.

9+: Target Japan or Republic of Korea.

a) Success will decrease the Ally Relationship for either Japan (1-5) or ROK (6-10) by one level.
b) Major success will decrease both Japan and ROK relationships by one level and add one China Influence in Asia/Pacific.

Resolve Attack (d10) using the applicable row:

RESULT	MAJOR SUCCESS	SUCCESS	FAILURE
If China Cyber Strategic Capability > US Cyber Strategic Capability	1-3	4-9	10
If China Cyber Strategic Capability = US Cyber Strategic Capability	1	2-7	8+
If China Cyber Strategic Capability < US Cyber Strategic Capability	-	1-5	6+

IF YOU STILL HAVE ACTIONS REMAINING, PROCEED TO ACTION #2 BELOW!

IF YOU HAVE NO CHINA ACTIONS LEFT, YOU HAVE COMPLETED THE "CHINA ACTS" SEGMENT. RETURN TO THE TURN SEQUENCE.

2.One Belt One Road (1 Action)

Place a "Trending Anti-US" counter on China's Relations with the US Track. Then perform the following steps using this list of Belt-and-Road regions: Asia/Pacific, Central/South Asia, the Middle East, Africa, Eastern Europe, and Eurozone:

1. Count the number of Belt-and-Road regions that have at least three China Influence (these are "Chinese-influenced Belt-and-Road regions").
2. If there are 0-1 such regions, perform option a, otherwise perform your choice of a or b:
   a. Place one China Influence counter in the two Belt-and-Road regions where China has the fewest Influence (break ties in the order the Belt-and-Road regions are listed above).
   b. Place a number of Improving Economy counters on China's SoE equal to half the number of Chinese-influenced Belt-and-Road regions (rounded up). Then place a number of "Trending Anti-US" counters equal to half the number of China-influenced Belt-and-Road regions (rounded down) in two of these regions where current US Alignment is 6 or greater (if more than two such regions, break ties in the order the Belt-and-Road regions are listed above).
3. Regardless of how you resolved step 2, immediately place two Tensions counters on China, and one Tensions counter each on Japan, India, Australia, ROK, Gulf States/Saudi Arabia, and Russia.

IF YOU STILL HAVE ACTIONS REMAINING, PROCEED TO ACTION #3 BELOW!

IF YOU HAVE NO CHINA ACTIONS LEFT, YOU HAVE COMPLETED THE "CHINA ACTS" SEGMENT. RETURN TO THE TURN SEQUENCE.

3. Expand China's Influence in Neighboring Regions (1 Action)

Attempt to expand China's Influence in one region. Attempt in the first region where the conditions are met; if no region's conditions are met, skip this Action.

a. **If any region(s) have three or more China Influence counters, create a China Base:** In any one region (randomize if there's more than one) where there are currently three or more China Influence counters, remove the three counters and replace them with a China Base. Immediately decrease the Relations with Congress Track by one box and the Public Approval Track by two boxes. Then place a "Trending Anti-US" counter on China's Relations with the US Track. This ends this action.

b. **Expand Chinese Influence:** Make one roll (see below) on the first region specified by the following conditions:

Attempt to expand Chinese Influence in Asia/Pacific if:

- There is 0-1 China Influence in Asia/Pacific, OR
- 2 China Influence in Asia/Pacific and 1+ China Influence in Central/South Asia

Attempt to expand Chinese Influence in Central/South Asia if:

- There is 0-1 China Influence in Central/South Asia

Otherwise, attempt to expand Chinese Influence in the first of the Middle East, Africa, or the Eurozone with no China Influence. **If all these regions have China Influence, skip this Action.**

Roll a d10 and add the selected region's US Regional Alignment. On a result of 10 or less place one China Influence counter in the selected region (and see below for Central/South Asia). If an Influence counter was placed and China's Relations with the US are at 1 or 2, also place a Trending Anti-US counter on the Region's US Regional Alignment. Any other result has no effect (but does count as China's Action for Action #3).

If attempt was in Central/South Asia and was successful and there is any Russian Influence there, roll another d10 (no modifiers):

1–5:	Place another China Influence counter in Central/South Asia.
6+:	Replace one Russia Influence counter in Central/South Asia with a China Influence counter (representing the growing competition between Russia and China for control of trade and energy routes in the region).

IF YOU STILL HAVE ACTIONS REMAINING, PROCEED TO ACTION #4 BELOW!

IF YOU HAVE NO CHINA ACTIONS LEFT, YOU HAVE COMPLETED THE "CHINA ACTS" SEGMENT. RETURN TO THE TURN SEQUENCE.

4. Reinforce Allies, Build Military, Use Force (1 Action)

Attempt the first two options where conditions are met (if only one option applies, perform it); if none apply, skip this action:

a. **If China has a relative strength on the China/Japan or India/China Conflict Track that is equal to or lower than either Japan or India, build China's military strength:** Select either the China/Japan or India/China Conflict Track (select the track that is less favorable to China; select China/Japan if tied), roll a d10 and subtract 2. If the result is less than the current China SoE value, move the relative strength counter on the selected track one box in China's favor and add one Tensions counter to China and the other country on the selected Conflict Track. Any other result has no effect.

b. **If Pakistan is at War with India, perform the first action specified by these conditions:**

- If the War Status is currently Indian forces Winning, China attempts to broker peace. Roll a d10 : on a result of 1-5 China's diplomacy succeeds and the war ends, otherwise no effect.
- If the India/China Conflict Track is 3 or 4, China intervenes with limited forces: if the India/China Conflict Track is at 3, add 3 strength to the Pakistan side in the War. If the India/China Conflict Track is at 4, add 5 strength to the Pakistan side in the War. +1 to Regional Crises in Asia/Pacific and place a "Trending Anti-US" counter on China's Relations with the US Track.
- Otherwise, China resupplies Pakistan: Roll a and subtract 1 if China is at Posture 2. On a result of 1-3, add 2 strength to the Pakistan side in the War. Otherwise, add 1 strength to the Pakistan side in the War.

c. **If the India/Pakistan Conflict Track is 3 or higher, attempt to reduce tensions with India (China doesn't want Pakistan to get into trouble).** Roll a d10 :

1–4:	**Success.** Decrease India/Pakistan Conflict Track by one box. Place one China Influence in Central/South Asia.
5+:	**Failure.** No effect.

IF YOU STILL HAVE ACTIONS REMAINING, PROCEED TO ACTION #5 BELOW!

IF YOU HAVE NO CHINA ACTIONS LEFT, YOU HAVE COMPLETED THE "CHINA ACTS" SEGMENT. RETURN TO THE TURN SEQUENCE.

5. Secure the Sea Lanes (1 Action)

If there are at least two China Influence in Asia/Pacific, perform this action. Otherwise, skip it. Roll a d10 and add 1 if China's Posture is 2:

1–6:	**Build or enhance mining, drilling, and military outposts in the South China Sea.** Place a "Trending Anti-US" counter on China's Relations with the US track and add one Tensions counter to each of China, Japan, Australia, and the ROK. Add one China Influence to Asia/Pacific. Unless China's Relations with US is currently "4" or "5", US may immediately make one attempt to impose Unilateral or Multilateral Sanctions on China, as per Diplomatic Master Action #7 on the Diplomatic Master Action Player Aid.
7+:	**Neighbors Contest Chinese Expansion.** Choose whether to use US Air and Naval forces to intimidate/threaten force against the Chinese. **If you don't,** immediately reduce US Alignment in Asia/Pacific by one full box, and place a "Trending Pro-US" counter on China's Relations with US Track." Also decrease Ally relationship by one level with one random Asia/Pacific Ally. Roll on the table below, adding 2 to the roll if you decided to use Air and Naval Forces.

Roll on this table only if you rolled 7+ on the table above.

1–3:	China wins Naval and Air Skirmishes with Vietnamese, Philippine, and/or Malaysian forces in the South China Sea. Add one China Influence to Asia/Pacific. Add three Tensions counters to each of China, Japan, Australia, and the ROK. Move China's Relations with the US one box left.
4–9:	• If the sum of US Naval and Air Strategic Capabilities is greater than the sum of China's Naval and Air Strategic Capabilities: Patrolling US Naval and Air units prevent Chinese Expansion. Add three Tensions counters to China. Remove one China Influence in Asia/Pacific or replace a China Base with two China Influence counters. Add one Tensions counter to Japan, Australia, and the ROK. Move China's Relations with the US one box left. • If not, apply "1-3" result, above.
10+	Miscalculations lead to hostilities between US/ Chinese air/naval forces. Compare US/China Air and Naval Strategic Capabilities and determine the net advantage (totalling **both** Capabilities) for one side or the other. Then apply the following results: • If the sum of US Naval and Air Strategic Capabilities is at least 2 greater than China's, the US wins a large naval/air skirmish, sinking a Chinese destroyer and shooting down several Chinese jets, before cooler heads prevail. Replace one China Base in Asia/Pacific with two China Influence counters OR remove one China Influence counter from Asia/Pacific. Add two Tensions counters to each of China, Japan, Australia, and India and increase the China/Japan Conflict Track by one box. Increase US Public Approval by three boxes, and RWC and Presidential Prestige by one box. +1 Legacy Point. Move China's Relations with the US three boxes left. • If the sum of China's Naval and Air Strategic Capabilities is at least 2 greater than the sum of US Naval and Air Capabilities, China wins a large naval/air skirmish in which they damage a US Aircraft Carrier and destroy several carrier-borne jets. Add two China Influence in Asia/Pacific. Decrease US Alignment in Asia Pacific by one box. -5 Public Approval. -1 RWC. -1 Presidential Prestige. -5 Legacy Points. Move China's Relations with the US three boxes left. • If neither of the above is true, there is a short, violent skirmish in which both sides lose air units and smaller escort vessels before they disengage and national leaders rein in their forces. Place two Tensions counters on each of China, Japan, ROK, and Australia. Move China's Relations with the US two boxes left.

IF YOU STILL HAVE ACTIONS REMAINING, PROCEED TO ACTION #6 BELOW!

IF YOU HAVE NO CHINA ACTIONS LEFT, YOU HAVE COMPLETED THE "CHINA ACTS" SEGMENT. RETURN TO THE TURN SEQUENCE.

6. Attempt to Expand China's Influence in Central and South America (1 Action)

Make one roll (see below) on the first region specified by the following conditions:

- Attempt to expand Chinese Influence in Central America if its Regional Alignment is less than 7 and there are 0-2 China Influence in Central America and either:
  - Regional Alignment in South America is 7+ OR
  - There are 2+ China Influence in South America and more China Influence in South America than Central America
- Attempt to expand Chinese Influence in South America if its Regional Alignment is less than 7. Otherwise, skip this action.

  Roll a d10 and add the selected region's US Regional Alignment. On a result of 10 or less place one China Influence counter in the selected region. Any other result has no effect (but does count as China's Action for Action #6).

IF YOU STILL HAVE ACTIONS REMAINING, PROCEED TO ACTION #7 BELOW!

IF YOU HAVE NO CHINA ACTIONS LEFT, YOU HAVE COMPLETED THE "CHINA ACTS" SEGMENT. RETURN TO THE TURN SEQUENCE.

7. Veto UN Sanctions (1 Action)

If there is currently a "UN Sanctions" counter on North Korea or Iran, China vetoes the renewal of Sanctions at the UN (otherwise skip this Action). Remove the "UN Sanctions" counter from North Korea (or Iran if no UN Sanctions on North Korea).

IF YOU STILL HAVE ACTIONS REMAINING, PROCEED TO ACTION #8 BELOW!

IF YOU HAVE NO CHINA ACTIONS LEFT, YOU HAVE COMPLETED THE "CHINA ACTS" SEGMENT. RETURN TO THE TURN SEQUENCE.

8. Oil Partnerships (1 Action)

China invests in additional production and infrastructure projects abroad aimed at securing channels for their growing oil import needs. Roll a d10:

1–3:	Place a China Influence counter in South America. Make a Regional Alignment Check (D18) in South America. If you fail, place a "Trending Anti-US" counter in the region.
4–6:	Place a China Influence counter in Africa. Make a Regional Alignment Check (D18) in Africa. If you fail, place a "Trending Anti-US" counter in the region.
7–10:	Place a China Influence counter in the Middle East. Make a Regional Alignment Check (D18) in Middle East. If you fail, place a "Trending Anti-US" counter in the region.

IF YOU STILL HAVE ACTIONS REMAINING, PROCEED TO ACTION #9 BELOW!

IF YOU HAVE NO CHINA ACTIONS LEFT, YOU HAVE COMPLETED THE "CHINA ACTS" SEGMENT. RETURN TO THE TURN SEQUENCE.

9. Test Cyberwar Against US Economy (1 Action)

If China Posture is 2 and Relationship with the US is 4 or less (otherwise, skip this action): Place two Tensions counters on China and place a "Trending Anti-US" counter on China's Relations with the US Track. Then make a US Homeland Security Check (D18):

0 or less: Top Secret US Cyber Security Software mitigates attack effect, tracks the attack to China, and launches a cyber counterattack that devastates Chinese military and political networks. Decrease China SoE by one box. Decrease China's Relative Strength Tracks against both Japan and India by one box. Move China's Relations with the US left by two boxes.

Pass Check (if not 0 or less, above): Moderate disruption to US. Place a "Worsening Economy" counter on US SoE Track. Decrease Public Approval by two boxes. Place an additional Tensions counter on China. Move China's Relations with the US left by one box.

Fail Check: Major Disruption. Decrease US SoE Track by one box and decrease Public Approval by five boxes and Relations with Congress and Homeland Security tracks by one box each. Place two Tensions counters on China. If Cyber Security bill is not already in Congress, introduce it immediately as Opponent's Legislation. Move China's Relations with the US left by two boxes.

DRMs:

+1 to all rolls (representing previously unknown Chinese technology)

-1 if US has passed Cyber Security Legislation

-1 If US Cyber Strategic Capabilities Rating is higher than China's

-2 for each National Security/Defense Greater Society Bill that has been passed.

IF YOU STILL HAVE ACTIONS REMAINING, PROCEED TO ACTION #10 BELOW!

IF YOU HAVE NO CHINA ACTIONS LEFT, YOU HAVE COMPLETED THE "CHINA ACTS" SEGMENT. RETURN TO THE TURN SEQUENCE.

10. Prepare for War (1 Action)

Skip this Action if China's Relations with US is 4 or 5. If China already attempted this action this Turn, skip it. China will provoke/intimidate either India or Japan. Select the country with the higher Conflict Track with China (if tied, select India). Then, refer to a or b, below.

a. Provoke/Intimidate India. Unless China has a Relative Strength at least two greater than India, build Military to Prepare for War. Increase China/India Relative Strength by one box in China's favor. Increase Reg.Crises in Central/South Asia by one box.

OR

If Chinese Relative Strength is already 2+ greater than India, use Troop incursions and overflights over disputed territories to provoke India, expand territory, and test their readiness for war. Increase Regional Crises in Central/South Asia by one box. Roll a d10 and subtract the number of China Influence in Central/South Asia:

1–3:	Economic and Political Considerations prevent India from responding. Place a China Influence counter in Central/South Asia. Place one Tensions counter on each of China and India.
4–6:	Immediate Indian responses and US promises of assistance to India dissuade the Chinese and heighten India's readiness. Place one Tensions counter on each of India and China. Improve India's Relative Strength by one box on the India/China Conflict Track.

7–8:	Tempers and Tensions Flare. Increase the India/China Conflict Track by one box. Place two Tensions counters on each of China and India. Increase Regional Crises in Central/South Asia by one box. Place a "Trending Anti-US" counter on China's Relations with the US Track.
9–10:	If India/China Conflict Track 3 or less, resolve 7-8 result instead. Otherwise: Miscalculations lead to War. Set India/China Conflict Track to War. Add three Tensions counters to each of China and India. Increase Regional Crises in Central/South Asia by two boxes.

b. Provoke/Intimidate Japan. Unless China has a Relative Strength at least two greater than Japan, build Military to Prepare for War. Increase China/Japan Relative Strength by one box in China's favor. Increase Regional Crises in Asia/Pacific by one box.

OR

If Chinese Relative Strength is already 2+ greater than Japan, use naval incursions and overflights over disputed territories to provoke Japan and test their readiness for war. Increase Regional Crises in Asia/Pacific by one box. Roll a d10 and subtract the number of China Influence in Asia/Pacific:

1–3:	Economic and Political Considerations prevent Japan from responding. Place a China Influence counter in Asia/Pacific. Place one Tensions counter on each of China and Japan.
4–6:	Immediate limited and local Japanese and US responses dissuade the Chinese and heighten Japan's readiness. Place one Tensions counter on each of Japan and China. Improve Japan's Relative Strength by one box on the China/Japan Conflict Track.
7–8:	Tempers and Tensions Flare. Increase the China/Japan Conflict Track by one box. Place two Tensions counters on each of China and Japan. Increase Regional Crises in Asia/Pacific by one box. Place a "Trending Anti-US" counter on China's Relations with the US Track.
9–10:	If China/Japan Conflict Track is at 3 or less or China's Relations with the US is 3 or higher, resolve 7-8 result instead. Otherwise: Miscalculations lead to War, forcing US to War with China to defend their ally and fulfill their treaty obligations. **This is a special war that does not cause auto-loss and is resolved via the following process.**

China/Japan War Resolution. To determine the outcome of the war, evaluate which side is superior in the following ten areas (areas that are tied don't count for either side):

- A higher value on each of the seven comparative (US/China) Strategic Capabilities.
- The current Relative Strength on the China/Japan Conflict Track.
- The number of China Influence compared to US Military Asset counters in Asia/Pacific (do not count Carriers/Marines in CVBG Deployment Zones).
- Pacific Ally Cohesion: If Relations with the US with Japan, Australia, and ROK are all "Very Close" and Asia/Pacific Stability is 5 or higher, this counts as US Superiority. Otherwise, it counts as Chinese Superiority.

If the US is superior to China in at least six of the ten areas, a combined US/Japanese force naval/air counterattack inflicts heavy losses on Chinese Naval and Air Forces. China wants peace:

- Remove two China Influence counters from Asia/Pacific and one from anywhere else in the world (player's choice.) Decrease China's SoE by one box and place a "Worsening Economy" counter on the US SoE Track. Add two Tensions counters to China. Move the China/Japan Conflict Track to the "2" box and the Relative Strength to the "Equal" box. +8 Public Approval. +1 RWC, +2 Presidential Prestige. +10 Legacy Points (everyone loves a winner). Set China's Relations with the US Track to 1. +1 to Regional Alignment in Asia Pacific. +2 Regional Crises in Asia/Pacific (resulting from the devastations and disruptions of war). **The game continues.**

If China is superior to the US in at least six of the ten areas (or superior in at least five of the ten areas if their Relative Strength advantage on the China/Japan Conflict Track is "+2"), China's air/naval/ ballistic missile onslaught, augmented by their skillful use of cyber and space assets, causes significant losses to Japanese and US forces in the theater, including sinking several US cruisers and heavily damaging a US aircraft carrier, with the loss of most of a deployed US fighter wing.

The game ends immediately in an auto loss for the US player.

If neither of the above applies, then days of air and naval action bloodies both sides, before calmer heads prevail and both sides agree to peace. Move the China/Japan Conflict Track to the "3" box. -4 Public Approval. -1 RWC. -5 Legacy Points (this happened on your watch). Adjust one US Ally relationship in Asia/Pacific by one level closer. Place two Tensions counters on each of China, Japan, Australia, ROK. Place a "Trending Anti-US" counter in Asia/Pacific. Place a "Worsening Economy" counter on both China and US SoE Tracks. Decrease China's Relations with the US by two boxes. **The game continues.**

THIS ENDS THE CHINA ACTS SEGMENT!

NOTE

In the event that you have completed this Actions list and China still has Actions remaining, do the following: For each remaining China Action, roll a d10 to determine a random Region. Place a China Influence counter in that Region.

WPC2 CHINA SUMMIT

When you choose Diplomatic Master Action #6 (Summit with China), conduct the following procedure:

Refer to China's current Relationship with the US to determine the maximum number of problem areas you may discuss at the summit. The number of problems is set at this point and does not change based on successful problem discussions. Note that you may only discuss one of each type of problem per Summit (for example, one "Contain a Rogue State" attempt):

Relationship 1	**1 Problem**
Relationship 2 or 3	**2 Problems**
Relationship 4 or 5	**3 Problems**

Choose the first problem area, then roll d10 on that line of the Summit Table to determine what China wants in order to improve the game state for that problem area applying the DRM from the current box of China's Relations with the US Track. Note that some problems require you to spend an AP.

Decide whether you are willing to agree to what China wants.

- **If so**, congratulations, you've successfully dealt with one problem area together. This part of the summit is a success! Update the game board to represent a) the "Result if Successful" improvement listed for that problem area, and b) whatever you gave to China in exchange for the improvement.
- **If not**, the discussion of this problem area concludes in failure. If you have another problem to discuss, repeat the steps above to discuss that problem.

Summit Results. When you have finished discussing all allowed Problems, the Summit is complete. Roll on the Summit Results Table to determine whether there are any game-state adjustments to make based on the percentage of Summit Problems you successfully dealt with.

SUMMIT TABLE

PROBLEM TO ADDRESS	Result if Successful	What China Demands/Offers (d10) 2 or less*	What China Demands/Offers (d10) 3-5*	What China Demands/Offers (d10) 6-8*	What China Demands/Offers (d10) 9+*
IMPROVE RELATIONS	Place "Trending Pro-US" counter on the China Relationship with US Track	Nothing. They see it in their best interest to improve relations	Nothing. They see it in their best interest to improve relations	Remove any Sanctions on China. If none, increase Trade – place an "Improving Economy" counter on China.	1 China Influence counter in Asia/Pacific OR Central/South Asia (your choice)
REMOVE SANCTIONS ON CHINA *(Only if there's a least one Sanctions counter on China)***	Remove any Sanctions on China; Remove one Tensions from China and from US Cabinet Focus (1 to 6)	China offers to limit island building in South China Sea. Place a -1 AP counter on China.	China offers to ease import restrictions. Place an "Improving Economy" counter on the US SoE Track	Nothing. They see the Sanctions as illegal to begin with and removing them as simply correcting a US mistake.	Nothing. They see the Sanctions as illegal to begin with and removing them as simply correcting a US mistake.
IMPROVE TRADE	Place "Improving Economy" counters on China and US. Remove one Tensions from China. +1 AP to you.	China offers to help mediate one Civil War of your choice. Replace one Civil War with a CW Ceasefire.	Nothing. They see it in their best interest to improve trade relations with the US.	Nothing. They see it in their best interest to improve trade relations with the US.	They want US to pressure India to allow China expanded access to Indian markets. +1 AP and Improving Econ. on China.
STABILIZE ASIA/ PACIFIC, CENTRAL/ SOUTH ASIA, AFRICA, OR SOUTH AMERICA *(Only if Relations with US are 2 or higher)***	-1 to Regional Crises in chosen region; remove one Tensions from China and each US ally in the region OR remove one Unstable State counter from the region.	Nothing. They see a stable region to be in their best interest.	Remove any Sanctions on China. If none, increase Trade – place an "Improving Economy" counter on China.	Remove any Sanctions on China AND +1 China Influence counter in the chosen region.	Remove any Sanctions on China AND +1 China Influence counter in the chosen region AND +1 AP counter on China.
JOINTLY MEDIATE A CIVIL WAR CEASEFIRE *(Only if Relations with US are 2 or higher)***	For one Civil War, replace it with a CW Ceasefire counter and a UN Peacekeepers. Roll d10: **1-3:** Place "Trending Pro-US" counter on region's Align. Track. **4-7:** No Effect. **8+:** +1 China Influence in the Region	Nothing, unless Civil War is in Asia/Pacific or Central/South Asia. Then add 1 China Influence in the region.	If Civil War is in Asia/Pacific or Central/South Asia, 1 China Influence in the region. Otherwise, +1 AP counter on China OR Place an "Improving Economy" counter on China's SoE Track (your choice).	Remove any Sanctions on China. Then, +1 China AP OR Improving Econ counter on their SoE (your choice).	Remove any Sanctions on China, +1 China AP, and 1 China Influence in the region.
