WORLD PEER RUSSIA ACTS

WPR1—RUSSIA ACTS 2
WPR2—RUSSIA SUMMIT 10

© 2025 GMT Games LLC,
P.O. Box 1308, Hanford, CA 93232
www.GMTGames.com

This Russia Acts Flipbook contains all the charts that you will use to determine the actions of Russia when called upon to do so in the Turn Sequence, as well as to determine the outcome of Summits between the USA and Russia.

WPR1 RUSSIA ACTS

The Russia Acts Flipbook may seem complex as it presents many possible actions, both optional and required, in a long procedural sequence, but it follows a simple process outlined in this flowchart. To fulfill the Russia Acts Segments in the Turn Sequence, just follow this basic sequence from beginning to end, following the instructions.

A DETERMINE IF VICTORY & PLAYER AUTO-LOSS

B POSTURE CHANGES & RESULTS

C IMPROVE STRATEGIC CAPABILITES

D ESPIONAGE

E IMPROVE ECONOMY

F CALCULATE NUMBER OF RUSSIA ACTIONS

G DEPENDENT ACTIONS
5 Possible Actions to do if Conditions are met & Russia Actions are available

H REMAINING ACTION HIERARCHY
10 Possible Actions to take, in order, to use any Remaining Russia Actions

A DETERMINE IF VICTORY & PLAYER AUTO-LOSS

HAS RUSSIA WON THE GAME?

RUSSIA AUTO VICTORY: Before performing any Actions, check these three conditions for immediate Russian Victory:

1. Russia has a base in Eastern Europe.
2. A total of 9 or more Russia Influence are on the map.
3. **Either** Eurozone Stability is <5 **or**
   Either NATO or the UK have Ally Relations with the US worse than "Very Close."

If all three of these are true, Russia has achieved its strategic objective of reclaiming Russian influence over Eastern Europe and eroding the cohesion of the Western European powers. ***The game ends immediately in an Auto Loss for the US player.***

IF RUSSIA HAS NOT WON THE GAME, THEN DID YOU JUST DRAW THE "RUSSIA ACTS (2)" CRISIS CHIT?

When you draw the Russia Acts (2) Crisis chit, skip down to the **Remaining Action Hierarchy** and perform two actions:

- Cyber Attacks (make 2 attacks)
- Roll a d10 to select another random action from the 1-10 list of Remaining Actions below. If you roll a 1 (Cyber Attacks), an action Russia would skip or a result that says it doesn't cost/count as an action, reroll for another action.

IF THE "RUSSIA ACTS (2)" CRISIS CHIT HAS NOT BEEN DRAWN, BUT YOU ARE USING THIS FLIPBOOK BECAUSE IT IS THE "RUSSIA ACTS" SEGMENT OF THE TURN SEQUENCE, PLEASE GO TO POSTURE CHANGES & RESULTS BELOW

B POSTURE CHANGES & RESULTS

BEGIN BY POSSIBLY CHANGING RUSSIA'S POSTURE & RELATIONSHIP WITH THE US

1. To determine whether Russia's Posture Changes and further effects of accumulated Tensions, flip all the Tensions counters on Russia, total their values, and then resolve the first condition that applies:

- If currently at Posture 1, and the sum of the flipped Tensions counters is five or more **and** Relations with the US is 1 or 2, increase Russia's Posture to 2.
  - **Poor Economy "Look over there!" Impetus:** If Russia is at Posture 1 and would not otherwise be entitled to increase to Posture 2, but their SOE is 3, immediately increase them to Posture 2 and decrease Stability in a random Region by one box. This represents a government approach of: "Let's get more aggressive abroad to take the peoples' minds off the troubles at home."
- If currently at Posture 2, and the sum of the flipped Tensions counters is 0–1, and Relations with the US is 4 or 5, decrease Posture to Posture 1.
- If currently at Posture 2, and the sum of the flipped counters is 5–9, randomly increase one of Russia's Conflict Tracks not currently at War by one box.
- If currently at Posture 2, and the sum of the flipped counters is 10+, increase both of Russia's Conflict Tracks by one box.

2. Based on the sum of the Tensions values above, Russia's Relationship with the US may be affected, as follows:

- If the sum of the counters is 0 or 1, place a "Trending Pro-US" counter on the Relations with US track.

- For every increment of five in the sum of the Tensions values, place one "Trending Anti-US" counter on the Relations with the US Track. Remember that on a Trending Track, 2 "Trending Anti-US" counters moves the marker on the Track one box to the left towards a worse relationship.

  For example if the sum of the Tensions values is 11, this is equal to two "Trending Anti-US" counters so Russia's relationship with the US worsens by one box. If the sum was 15, Russia's relationship with the US would worsen one box and a "Trending Anti-US" counter would be placed. (See "Trending Tracks" in the Governing Manual for more information.)

3. Then immediately (before you perform any other actions) remove all the Tension counters on Russia and redraw HALF (rounded up) the number of counters you removed and replace them number side down.

C IMPROVE STRATEGIC CAPABILITES

AFTER CHECKING FOR AND, IF NECESSARY, CHANGING RUSSIA'S POSTURE, THEN
IMPROVE RUSSIAN STRATEGIC CAPABILITIES

Increase Strategic Capabilities: Make **two** (if currently at Posture 1) or **three** (if currently at Posture 2) attempts to improve Russia's Strategic Capabilities according to the priorities below. For each attempt, roll a d10 and add 1 if there are any Sanctions counters on Russia. A 1–4 result at Posture 1 or a 1–5 result at Posture 2 equals success; increase the current Capability by one box.

Use the following hierarchy to determine which areas you attempt to improve, until you have completed all your allowed improvement attempts:

1. **Areas in which Russia trails the US by two or more boxes.** Attempt to improve each of those areas once until you are out of attempts or all of those areas have been attempted. If there are more than two/three areas, determine randomly for the two/three attempts.
2. If you have two or more actions left, attempt to increase both **Cyber Warfare** and **Strategic Missiles/Defense**. If only one action remains, choose between them randomly.
3. For any remaining actions, roll a d10 for each action and reference the random number ranges on the Strategic Capabilities Tracks to determine which attempts to make.

NOTE: Multiple attempts may be made to improve a Capability but it may only be improved by **one box total**. Once it is improved, do not roll for it again. For example, you may attempt to improve Cyber Warfare because Russia trails the US by two or more boxes (step 1 above) and again because you have actions remaining (step 2 above).

D ESPIONAGE

AFTER ATTEMPTING TO IMPROVE RUSSIA'S STRATEGIC CAPABILITIES. THEN
CONDUCT ESPIONAGE

If Russia's Relations with the US is 1 or 2 and Posture is 2, they make two Espionage attempts to steal from the US and its allies. Otherwise, they make one Espionage attempt. For each attempt, apply DRMs (below) and roll a d10:

≤0:	**Thwart US Counter-intelligence and Steal Technology** First, if there is a "+2 DRM for Espionage Remainder of Game" counter on Russia, remove it. Then Roll d10 and refer to the random ranges on the Strategic Capabilities Chart. Increase Russia's Capability in that area by one box.
1–3:	**Steal Technology**. Roll d10 to identify a random Strategic Capability. Increase Russia's Capability in that area by one box.
4–7:	**Steal Military Secrets/War Plans**: a. If possible, increase the strength of any Adversary in a US War by "2". If not possible, increase the strength of any Adversary in an Ally or US-Supported War by "2". b. Otherwise, increase Russia/NATO's relative Strength by one box in Russia's favor on the Conflict Track.
8–9:	**Failure**. No Effect.
10–11:	**Failure exposes Russian Cyber/Intel means or methods.** Place a free "DARPA/Rapid Capabilities" counter on the Cyber Warfare Track (if one is available and one is not there already) and a "+2 DRM to Next Espionage" counter on Russia.
12+:	**US Counter-Intelligence identifies major Russian Cyber Espionage Network on Western soil.** Place a "Trending Anti-US" counter on Russia's Relations with the US Track. Then the US player may either (your choice) a. **Apprehend/ expose the spies, disrupt Russian networks, and embarrass Russia on the world stage**. Remove one Russia Influence counter from the Eurozone and one from Eastern Europe, place a -1 AP counter on Russia, and place a "+2 DRM To Next Espionage" counter on Russia. OR b. **Use your counter-intelligence treasure trove to create a long-term advantage and feed disinformation to Russia**. Immediately decrease Russian Cyber Warfare Strategic Capability by one box and increase Russia/NATO Relative Strength on the Conflict Track by one box in NATO's favor. Then Place a "+2 DRM for Espionage Remainder of Game" counter on Russia if one is not there already.

DRMs (+/- 3 Max):
-1/-2 if Russia's Cyber Warfare Strategic Capability is 1/2+ higher than the US's Cyber Warfare Strategic Capability.

-2 if any US ally relationship is currently "Estranged."

-1 if the US Ally relationship with any ally except India or the Gulf States/SA is not Very Close.

+1/+2 if the US Cyber Warfare Strategic Capability is 1/2+ higher respectively than Russia's Cyber Warfare Strategic Capability.

+2 if there is a "+2 DRM to Next Espionage" counter on Russia. (If so, then remove it after you make this roll and before you apply the effects of the roll.)

+2 if there is a "+2 DRM for Espionage Remainder of Game" counter on Russia.

E IMPROVE ECONOMY

AFTER PERFORMING ESPIONAGE,
THEN

ATTEMPT TO IMPROVE RUSSIAN ECONOMY

Do not perform if Russia's SoE is already at 7.

Roll a d10:

1–4:	Place an "Improving Economy" counter on Russia.
5–8:	No Change.
9+:	Place a "Worsening Economy" counter on Russia. The Federation Council is not happy. They place extra focus on the internal situation and economic inadequacies. Reduce Russia Actions by one when calculating number of Russia Actions below.

DRMs (+3/-3 Max):
+1 if there is a Unilateral Sanctions counter on Russia

+3 if there is a Multilateral Sanctions counter on Russia

-1 per Russia Influence in the Eurozone, Eastern Europe, and/or Central/South Asia

-1 if Russia's Relationship with the US is 5

F CALCULATE NUMBER OF RUSSIA ACTIONS

AFTER ATTEMPTING TO IMPROVE RUSSIA'S ECONOMY,
THEN

CALCULATE NUMBER OF RUSSIA ACTIONS

(USE THESE ACTIONS IN THE FOLLOWING DEPENDENT AND REMAINING ACTION HIERARCHIES)

- Russia receives a number of actions equal to the current value on their SOE track, **plus one**. This is modified by the value at the bottom of their "Relations with the US" Track.
- Modify that base number for any "+1 APs" or "-1 APs" counters that are currently on Russia. Then remove those counters from the map.
- If you rolled a 9+ on your earlier Attempt to Improve the Russia Economy, subtract one from the total number of allowed Russia Actions.

Test Team Suggestion: We've found that tracking the current remaining number of Russia Actions is easily accomplished by using a die and decrementing the number on the die to represent remaining actions each time you use one.

G DEPENDENT ACTIONS
5 Possible Actions to do if Conditions are met & Actions are available

ONCE YOU HAVE CALCULATED THE NUMBER OF RUSSIA ACTIONS, PLEASE PERFORM THE DEPENDENT ACTIONS, BEGINNING BELOW

Perform each action listed below once, in order, until all Russia Actions have been used or all actions have been performed.

1. Terror in Central/South Asia. If there are at least 5 total Terror Group levels (combination of values on all the Terror Groups) in the Central/South Asia region, use one Russia Action to remove one Terror Level from the largest group in the region. (This represents Russia dealing with internal dissent among ethnic, political, and religious opposition in "The Stans".)

2. Quell Rising Internal Dissent: Roll a d10 adding 1 if Russia Posture is 2:

1–4:	Use one Russia Action to allocate the human and financial capital needed to address Political, Social and Infrastructure Costs (Strengthening the Kremlin's hold on power, War on Corruption, Strengthening Financial and Social Institutions, Monitoring and Combating Social Discontent, etc.). In effect, Russia loses an Action with no game effect.
5+:	No effect; this step doesn't cost an action this turn.

3. Reinforcements. If Russia is at War, spend a Russia Action, then roll a d10 to send reinforcements:

1–3:	Add 2 Strength Points to a random Russia War.
4–8:	Add 1 Strength Point to a random Russia War.
9+:	Reinforcements delayed – none this turn.

4. Possible Syrian Intervention.
If you are a new player or it is Year 1 of the game, skip this action. Additionally, skip this action if any of these three conditions are true:

- If there are no Civil War (not CW Ceasefire) markers in the Middle East
- If Russia has at least three Influence in the Middle East
- If US Regional Alignment in the Middle East is 8

Otherwise, Russia Intervenes (or sends reinforcements for its forces) in the Syrian Civil War. Place Russia Influence counters and adjust Russia's Relations with the US according to the current US Regional Alignment in the Middle East:

US Regional Alignment = 3: Place three Russia Influence counters in the Middle East. Move Russia's Relations with the US two boxes left.

US Regional Alignment = 4 or 5: Place two Russia Influence counters in the Middle East. Move Russia's Relations with the US one box left.

US Regional Alignment = 6 or 7: Place one Russia Influence counter in the Middle East. Place a "Trending Anti-US" marker on Russia's Relations with the US Track.

5. New Conflict in Eastern Europe or Central/South Asia? If there is a Rogue State of any level in either region *that is not already at war with anyone* (if there are Rogue States in both regions, choose the higher level Rogue State, or select one randomly if they are equal level), roll a d10 :

1–3:	**(Action Spent)** Russia initiates a Combined Air/Ground war with that Rogue State. Set up War as indicated on Chart WM5 in the World Charts Booklet and perform initial War Progress roll, as usual, with a -2 drm to the initial War Progress roll to represent a Russian surprise attack and use of Sophisticated Electronics.
4–7:	**(No Action Spent)** Russia launches a limited clandestine Spetsnaz-led decapitation operation aimed at the Rogue State's leadership cells. roll a d10 : **1–7: Success!** Decrease the Rogue State in that region by one level (if already at lvl 1, remove it and replace with a lvl 4 Terror Group) **8+: Failure**: The operation is compromised by poor local intel and unfavorable security conditions. Russian aggression is exposed, inciting Nationalists throughout the region. Remove one Russia influence in the region (if there are none to remove, place a "Trending Pro-US" counter in the region, instead).
8+:	**(No Action Spent)** Russia declines to spend limited resources to deal with the Rogue State threat at this point.

IF YOU HAVE ANY RUSSIA ACTIONS LEFT, PLEASE DO AS MUCH OF THE REMAINING ACTION HIERARCHY AS YOU CAN!

IF YOU HAVE NO RUSSIA ACTIONS LEFT, YOU HAVE COMPLETED THE "RUSSIA ACTS" SEGMENT. RETURN TO THE TURN SEQUENCE.

H — REMAINING ACTION HIERARCHY

10 Possible Actions to take, in order, to use any Remaining Russia Actions

Perform each action listed below once, in order, until all Russia Actions have been used or all actions have been performed.

1. Cyber Attacks and Online Disinformation Campaigns to Disrupt, Weaken, Confuse, and Delay (1 Action)

Make two attacks using the chart below if at Posture 1 or three attacks if at Posture 2. (If you are performing Cyber Attacks as part of a Russia Acts (2) Crisis chit activation, make two attacks.) For each attack, roll a d10 to determine target, then roll another d10 to resolve the attacks on the "Resolve attack" chart:

Determine Target (d10) :

1:	**Target US Economy**. a) Success places a "Worsening Economy" counter on the US SoE Track. b) Major success decreases the SoE by one box and increases US Domestic Crises by one box.
2–3:	**Target US Political Cohesion**. a) Success decreases Relations with Congress by one box and Bipartisan Cooperation by one box. b) Major Success decreases Relations with Congress by one box and Bipartisan Cooperation by one box, and you must also randomly discard one Congressional Friend. If no such Friend exists, instead decrease Cabinet Effectiveness by one box and decrease public approval by two boxes.
4:	**Discredit US President.** a) Success: -1 AP (if available) and decrease Public Approval by one box. b) Major Success: -2 APs (if available) and decrease Relations with Congress by one box and Public Approval by two boxes.
5–6:	**Target EU Cohesion.** a) Success increases Regional Crises in both the Eurozone and Eastern Europe by one box. b) Major Success decreases the Stability of the Eurozone by one box and increases Regional Crises in Eastern Europe by two boxes.
7–8:	**Target US Relationship with European Allies.** a) Success decreases the NATO Ally Relationship by one level (if possible, otherwise decrease the UK Ally Relationship by one level). b) Major success decreases both the NATO and UK Ally Relationships by one level.
9–10:	**Target Eastern Europe Democracies.** a) Success adds a Russia Influence counter in Eastern Europe. b) Major Success adds two Russia Influence counters in Eastern Europe and increases Regional Crises in Eastern Europe by one box.

Resolve Attack (d10) using the applicable row:

RESULT	MAJOR SUCCESS	SUCCESS	FAILURE
DR If Russia Cyber Strategic Capability > US Cyber Strategic Capability	1-3	4-9	10
DR If Russia Cyber Strategic Capability = US Cyber Strategic Capability	1	2-7	8+
DR If Russia Cyber Strategic Capability < US Cyber Strategic Capability	-	1-5	6+

IF YOU STILL HAVE ACTIONS REMAINING, PROCEED TO ACTION #2 BELOW!

IF YOU HAVE NO RUSSIA ACTIONS LEFT, YOU HAVE COMPLETED THE "RUSSIA ACTS" SEGMENT. RETURN TO THE TURN SEQUENCE.

2. Initiate Multi-Domain Low Intensity "Grey Zone" Attacks to Expand Russia's Influence in Neighboring Regions (1 Action)

Attempt to expand Russia's Influence in one region. Attempt in the first region where the conditions are met; if no region's conditions are met, skip this Action.

a. **If any region(s) have three or more Russia Influence counters, create a Russia base:** In any one region (randomize if there's more than one) where there are currently three or more Russia Influence counters, remove the three counters and replace them with a Russian Base. Immediately decrease the Relations with Congress Track by one box and the Public Approval Track by two boxes. Then place a "Trending Anti-US" counter on Russia's Relations with the US Track. This ends this action.

b. **Expand Russian Influence:** Make one roll (see below) on the first region specified by the following conditions:

Attempt to expand Russian Influence in Eastern Europe if:

- There are 0-1 Russia Influence in Eastern Europe, OR
- 2 Russia Influence in Eastern Europe and 3+ Russia Influence in the Eurozone.

Attempt to expand Russian Influence in the Eurozone if:

- There are less than 3 Russia Influence in the Eurozone.

Attempt to expand Russian Influence in Central/South Asia if:

- There are less than 3 Russia Influence in Central/South Asia.

Otherwise skip this Action.

Roll a d10 and add the selected region's US Regional Alignment. On a result of 10 or less place one Russia Influence counter in the selected region (and see below for Central/South Asia). If an Influence counter was placed and Russia's Relations with the US are at 1 or 2, also place a Trending Anti-US counter on the Region's US Regional Alignment. Any other result has no effect (but does count as Russia's Action for Action #2).

If attempt was in Central/South Asia and was successful and there is any Chinese Influence there, roll another d10 (no modifiers):

1–5:	Place another Russia Influence counter in Central/South Asia.
6+:	Replace one China Influence counter in Central/South Asia with a Russia Influence counter (representing the growing competition between Russia and China for control of trade and energy routes in the region).

IF YOU STILL HAVE ACTIONS REMAINING, PROCEED TO ACTION #3 BELOW!

IF YOU HAVE NO RUSSIA ACTIONS LEFT, YOU HAVE COMPLETED THE "RUSSIA ACTS" SEGMENT. RETURN TO THE TURN SEQUENCE.

3. Compromise to Facilitate Removal of Sanctions? (1 Action)

Skip this Action if there are no Sanctions counters on Russia.

If Russia's Relations with the US is currently 4 or 5, remove all Sanctions counters on Russia and continue to the next Action (this does not cost an Action).

If any Sanctions counters are currently on Russia, roll a d10 applying the DRMs listed below:

1–3:	**"Nyet!!!"** Russian leaders refuse to Compromise. Sanctions remain.
4–8:	**Compromise Achieved**. Remove one Russia Influence counter in Eastern Europe (or the Eurozone if there are none in Eastern Europe), then remove all Sanctions. If there are no Russia Influence counters in either region, place a -1 AP counter on Russia and remove all Sanctions.
9+:	**The West Stands Firm and Russia blinks**. If Russian Posture is currently Posture 2, decrease to Posture 1 and remove all Sanctions. If Posture is already 1, decrease Status on Russia/NATO Conflict Track by one Box and remove all Sanctions. If that Track is already at 1, then remove two Russia Influence counters anywhere on the map (your choice) and remove the Sanctions.

DRMS (+/- 3 Max):
-1 Russia is currently at Posture 2

-2 if Russian Strategic Missiles/Missile Defense Capability is 2+ boxes higher than the US

-2 if Russia is on the Russia +2 Box in Relative Strength on the Russia/NATO Conflict Track.

+1 if Eastern Europe Stability is 6 or higher

+1 if Eurozone Stability is 7 or higher AND Eastern Europe Stability is 6 or higher.

+1 if US Strategic Missiles/Missile Defense Capability is 1+ boxes higher than Russia OR if NATO is on the

NATO +1 or +2 box in Relative Strength on the Russia/ NATO Conflict Track.

+1 if Russia just spent its last available Action during the Russia Acts Segment (Russian leaders realize that Sanctions are impeding other desired Actions, so they attempt to compromise to end them).

+2 if there is a Multilateral Sanctions marker on Russia.

IF YOU STILL HAVE ACTIONS REMAINING, PROCEED TO ACTION #4 BELOW!

IF YOU HAVE NO RUSSIA ACTIONS LEFT, YOU HAVE COMPLETED THE "RUSSIA ACTS" SEGMENT. RETURN TO THE TURN SEQUENCE.

4. Secure/Exploit/Militarize the Arctic (1 Action)

Roll a d10 :

1–2:	**No Event.** Russian ambitions are elsewhere. No effect, do not spend an Action.
3–4:	**Deep Sea Mining Yields Arctic Riches**. Place an Improving Economy counter on Russia's SoE track.
5–6:	**Warming Ice Pack allows increased use of northern ports and training of naval units**. Increase Russia's Naval Forces Training & Tech Strategic Capability by one box.
7–8:	**Naval/Air advantage over NATO on expanded northern Flank**. Move the Relative Strengths counter on the Russia/NATO Conflict track +1 in Russia's favor. Place two Tensions counters on each of Russia, NATO, and Canada.
9+:	**Russian expansion attempts rile neighbors, leading to increased legal conflicts, naval exercises, and budgets/research for arctic operations**. Remove one Russia Influence from Eurozone (priority) or Eastern Europe. Add two Tensions to Russia, UK, NATO, and Canada. Place a "DARPA/Rapid Capabilities" counter on the Naval Forces Training & Tech Strategic Capability. Place a "Trending Anti-US" counter on Russia's Relations with the US Track.

IF YOU STILL HAVE ACTIONS REMAINING, PROCEED TO ACTION #5 BELOW!

IF YOU HAVE NO RUSSIA ACTIONS LEFT, YOU HAVE COMPLETED THE "RUSSIA ACTS" SEGMENT. RETURN TO THE TURN SEQUENCE.

5. Reinforce Allies, Build Military, Use Force (1 Action)

Attempt the two options below, in this order, if the conditions are met. If only one condition is met, perform only that option. If no conditions are met, skip that action.

a. **If Russia has a relative strength on the Russia/NATO Conflict Track that is equal to or lower than NATO, build Russia's military strength in the west:**

Roll a d10 and subtract 2. If the result is less than the current Russia SoE value, move the Russia/NATO relative strength counter one box in Russia's favor and add two Tensions counters to each of Russia, NATO, the UK, and Canada. Any other result has no effect.

b. **If Serbia is at War, perform the first action specified by these conditions:**

- If the War Status is currently Serbian forces Losing, Russia attempts to broker peace. Roll a d10 : on a result of 1-4 Russia's diplomacy succeeds and the war ends, otherwise no effect.
- Otherwise, Russia attempts to resupply Serbia: Roll a d10 and subtract 1 if Russia is at Posture 2. On a result of 1-6, add 1 strength to Serbia's side in the War, otherwise no effect.

IF YOU STILL HAVE ACTIONS REMAINING, PROCEED TO ACTION #6 BELOW!

IF YOU HAVE NO RUSSIA ACTIONS LEFT, YOU HAVE COMPLETED THE "RUSSIA ACTS" SEGMENT. RETURN TO THE TURN SEQUENCE.

6. Veto UN Sanctions (1 Action)

If there is currently a "UN Sanctions" counter on Iran or North Korea, Russia vetoes the renewal of Sanctions at the UN (otherwise skip this Action). Remove the "UN Sanctions" counter from Iran (or North Korea if no UN Sanctions on Iran).

IF YOU STILL HAVE ACTIONS REMAINING, PROCEED TO ACTION #7 BELOW!

IF YOU HAVE NO RUSSIA ACTIONS LEFT, YOU HAVE COMPLETED THE "RUSSIA ACTS" SEGMENT. RETURN TO THE TURN SEQUENCE.

7. Assist Iranian Nuclear Program (1 Action)

If Russia's Relations with the US are 3 or less, the Iranian Nuclear Missile Program Track is currently in the 1, 2, or 3 box and there is no "Can't Increase this Turn" marker on it, Russia attempts to help Iran improve their Nuclear Missile Program (otherwise, skip this action). Roll a d10 :

1–5:	**Success!** Increase the Iranian Nuclear Missile Program by one box (and apply any results of the increase).
6+:	**Failure.** No effect.

DRMs: Highest of +1/+2/+3 if there is a Unilateral/Multilateral/ UN Sanctions counter on Iran.

IF YOU STILL HAVE ACTIONS REMAINING, PROCEED TO ACTION #8 BELOW!

IF YOU HAVE NO RUSSIA ACTIONS LEFT, YOU HAVE COMPLETED THE "RUSSIA ACTS" SEGMENT. RETURN TO THE TURN SEQUENCE.

8. Assist North Korean Missile Program (1 Action)

If Russia's Relations with the US are 3 or less, the North Korean Missile Program Track is currently in the 1, 2, or 3 box and there is no "Can't Increase this Turn" marker on it, attempt to help North Korea improve their nuclear program (otherwise, skip this action). Roll a d10 and add the number of Sanctions counters on North Korea (not their value; do not flip them to reveal the values):

1–5:	**Success!** Increase the North Korean Missile Program by one box (and apply any results of the increase).
6+:	**Failure.** No effect.

IF YOU STILL HAVE ACTIONS REMAINING, PROCEED TO ACTION #9 BELOW!

IF YOU HAVE NO RUSSIA ACTIONS LEFT, YOU HAVE COMPLETED THE "RUSSIA ACTS" SEGMENT. RETURN TO THE TURN SEQUENCE.

9. Middle East Influence (1 Action)

Attempt the first option where conditions are met:

a. **If there are fewer than three Russian Influence in the Middle East, attempt to place one Russian Influence counter there:** roll a d10 and add the Middle East's US Regional Alignment. If the result is 10 or less, place one Russia Influence in the Middle East.

b. **If there are already three Russian Influence in the Middle East, and there is a War in the Middle East:** Russia sends weapons. Add 1 strength to an Adversary in a US or an Ally War in the Middle East (choose randomly if more than one War is eligible).

c. **Destabilize.** Otherwise, increase the Regional Crises in the Middle East by two boxes.

IF YOU STILL HAVE ACTIONS REMAINING, PROCEED TO ACTION #10 BELOW!

IF YOU HAVE NO RUSSIA ACTIONS LEFT, YOU HAVE COMPLETED THE "RUSSIA ACTS" SEGMENT. RETURN TO THE TURN SEQUENCE.

10. Prepare for War/Probe NATO (1 Action)

Skip this Action if Russia's Relations with US is 4 or 5. Only one attempt per Turn.

If Russia has a Relative Strength less than or equal to NATO, then build Military to Prepare for War. Increase Russia/NATO Relative Strength by one box in Russian favor on the Russia/NATO Conflict Track. Place "Trending Anti-US" Counter on Russia's Relations with the US Track.

OR

If Russian Relative strength is greater than NATO strength, use border incursions, overflights, and cyberattacks to provoke NATO and test their readiness for war. Place a "Trending Anti-US" counter on Russia's Relations with the US Track. Roll a d10:

3 or less:	Immediate limited and local NATO and US responses dissuade the Russians and heighten NATO's readiness. Place one Tensions counter on each of NATO and Russia. Improve NATO's Relative Strength by one box on the Russia/NATO Conflict Track.
4–6:	Economic and Political Considerations prevent NATO from responding. Place a Russia Influence counter in Eastern Europe. Place one Tensions counter on each of Russia and NATO.
7–8:	Tempers and Tensions Flare. Increase the Russia/NATO Conflict Track by one box. Place two Tensions counters on each of Russia, NATO, the UK, and Canada. Increase Regional Crises in Eastern Europe by one box. Place a "Trending Anti-US" counter on Russia's Relations with the US Track.
9+:	If Russia/NATO Conflict Track 3 or less or Russia's Relations with the US Track is 3 or greater, resolve 7-8 result instead. Otherwise: Russia Attacks Eastern Europe! US forces go to war with Russia to defend their allies and fulfill their treaty obligations. **This is a special war resolved via the process on the next page.**

DRMs (+/-3 Max):

+/- DRM in current box of Relations with the US Track

+/- the difference in Russia Influence currently in Eastern Europe and US Military Asset counters currently in Eastern Europe. Difference in Russia's favor are + DRMs. Differences in US favor are - DRMs.

Russia/NATO War Resolution (if you rolled 9+ on the previous table). Evaluate which side is superior in the following ten areas (areas that are tied don't count for either side):

- A higher value on each of the seven comparative Strategic Capabilities
- The current Relative Strength on the Russia/NATO Conflict Track
- The number of Russia Influence compared to US Military Asset counters in Eastern Europe.
- NATO Cohesion: If Relations with the US with NATO, the UK, and Canada are all "Very Close" and Eurozone Stability is 5 or higher, this counts as US Superiority. Otherwise, it counts as Russia Superiority.

If the US is superior to Russia in at least six of the ten areas: After initial Russian gains, a well-prepared US/NATO force launches a multi-dimensional land/air/naval/space/cyber counterattack that inflicts heavy and unsustainable losses on Russian forces. Russia wants peace:

Remove two Russia Influence counters from Eastern Europe and/or the Eurozone, and one from any other Region in the world (player's choice). Decrease Russia's SoE by one box. Move the Russia/NATO Conflict Track back to the "2" box and the Relative Strength to the "+1 NATO" box. +8 Public Approval. +1 RWC, +2 Presidential Prestige. +10 Legacy Points (everyone loves a winner). Set Russia's Relations with the US Track to 1, with a "Trending Anti-US" counter on it. +1 to Alignment in both the Eurozone and Eastern Europe. +2 Regional Crises in Eurozone and +3 in Eastern Europe (resulting from the devastation and disruptions of war). **The game continues.**

If Russia is superior to the US in at least six of the ten areas (or superior in at least five of the ten areas if their Relative Strength advantage on the Russia/NATO Conflict Track is "+2"), Russia's ground/air/naval/ ballistic missile onslaught, augmented by their skillful use of cyber and space assets, causes significant losses to NATO and US forces in the theater, including capital ships and subs in the Baltic and North Atlantic. The rapid Russian advance captures the Baltic States and huge swaths of Ukraine and Poland, including both Kyiv and Warsaw. A shaken NATO sues for peace, leaving Russia with massive territorial gains in Eastern Europe.

The game ends immediately in an auto loss for the US player.

If neither of the above applies, then days of air, ground, and naval action bloody both sides, before calmer heads prevail and both sides agree to a tense peace. Move the Russia/NATO Conflict Track back to the "3" box. -4 Public Approval. -1 RWC. -5 Legacy Points (this happened on your watch). Adjust US Ally relationships with NATO, UK, and Canada to "Very Close" if they're not already. (comrades in arms). Place two Tensions counters on each of Russia, NATO, Canada, UK. Place a "Worsening Economy" counter on Russia, Eurozone, and US SoE Tracks. Place a "Trending Anti-US" counter on Russia's Relations with the US Track. Remove one Russia Influence from Eastern Europe (you may break down a Base to two influence counters if there is only a Base in Eastern Europe). Remove ALL Russia Influence counters from the Eurozone (Russia's aggression has made their intentions clear).

Then roll a d10 to determine Stability and US Alignment outcomes in Europe:

1–3:	+1 Regional Crises in both Eurozone and Eastern Europe. Place a "Trending Pro-US" counter on each.
4–7:	+2 Regional crises in Eastern Europe. +1 Regional Crises in the Eurozone.
8+:	-1 Stability in both Eastern Europe and the Eurozone. Place a "Trending Anti-US" counter ("the Americans got us into this!") in each region.

THIS ENDS THE RUSSIA ACTS SEGMENT!

NOTE: In the event that you have completed this Actions list and Russia still has Actions remaining, do the following: For each remaining Russia Action, roll a d10 to determine a random Region. Place a Russia Influence counter in that Region.

WPR2 RUSSIA SUMMIT

When you choose Diplomatic Master Action #6 (Summit with Russia), conduct the following procedure:

Refer to Russia's current Relationship with the US to determine the maximum number of problem areas you may discuss at the summit. The number of problems is set at this point and does not change based on successful problem discussions. Note that you may only discuss one of each type of problem per Summit (for example, one "Contain a Rogue State" attempt):

Relationship 1	**1 Problem**
Relationship 2 or 3	**2 Problems**
Relationship 4 or 5	**3 Problems**

Choose the first problem area, then roll a d10 (no DRMs) on that line of the Summit Table to determine what Russia wants in order to improve the game state for that problem area. Note that some problems require you to spend an AP.

Decide whether you are willing to agree to what Russia wants.

- **If so**, congratulations, you've successfully dealt with one problem area together. This part of the summit is a success! Update the game board to represent a) the "Result if Successful" improvement listed for that problem area, and b) whatever you gave to Russia in exchange for the improvement.
- **If not**, the discussion of this problem area concludes in failure. If you have another problem to discuss, repeat the steps above to discuss that problem.

Summit Results. When you have finished discussing all allowed Problems, the Summit is complete. Roll on the Summit Results Table to determine whether there are any game-state adjustments to make based on the percentage of Summit Problems you successfully dealt with.

SUMMIT TABLE

PROBLEM TO ADDRESS	RESULT IF SUCCESSFUL	WHAT RUSSIA DEMANDS/OFFERS (D10) 2 OR LESS	WHAT RUSSIA DEMANDS/OFFERS (D10) 3-5	WHAT RUSSIA DEMANDS/OFFERS (D10) 6-8	WHAT RUSSIA DEMANDS/OFFERS (D10) 9+
IMPROVE RELATIONS	Place "Trending Pro-US" counter on the Russia Relationship with US Track	Nothing. They see it in their best interest to improve relations	Nothing. They see it in their best interest to improve relations	Remove any Sanctions on Russia. If none, increase Trade – place an "Improving Economy" counter on Russia.	1 Russia Influence counter in Eastern Europe.
REMOVE SANCTIONS ON RUSSIA *(Only if there's at least one Sanctions counter on Russia)**	Remove any Sanctions on Russia; Remove one Tensions from Russia and from US Cabinet Focus (1 to 6)	Russia offers cheaper oil to Europe. Place an "Improving Economy" counter on the Eurozone SoE Track	Russia offers more cooperation and less aggression. Place a -1 AP counter on Russia.	Nothing. They see the Sanctions as illegal to begin with and removing them as simply correcting a US mistake.	Nothing. They see the Sanctions as illegal to begin with and removing them as simply correcting a US mistake.
IMPROVE TRADE	Place "Improving Economy" counters on Russia, Eurozone, and US. Remove one Tensions from Russia, +1 AP to you.	Russia Offers to help mediate one Civil War of your choice. Replace one Civil War with a CW Ceasefire.	Nothing. They see it in their best interest to improve trade relations with US and Europe.	Nothing. They see it in their best interest to improve trade relations with US and Europe.	They'll sell more oil to the west, but only in exchange for US and European investments. +1 AP on Russia.
STABILIZE EASTERN EUROPE, CENTRAL/SOUTH ASIA, MIDDLE EAST, OR CENTRAL AMERICA *(Only if Relations with the US are 2 or higher)**	-1 to Regional Crises in the region. Remove one Tensions from Russia OR remove one Unstable State counter from the region.	Nothing. They see a stable Region to be in their best interest.	Remove any Sanctions on Russia. If none, increase Trade – place an "Improving Economy" counter on Russia.	Remove any Sanctions on Russia AND +1 Russia Influence counter in Eastern Europe.	Remove any Sanctions on Russia AND +1 Russia Influence in Eastern Europe AND +1 AP counter on Russia.
