This section of the World Charts contains all the charts that you will use to determine the results of events calling upon a diplomatic response, including Regional Crises, Regional Summits, Trade Agreements, and UN actions.

DIPLOMATIC CHARTS

WD1 REGIONAL MAJOR CRISIS TABLE

If a Major Regional Crisis breaks out, **-2 Public Approval**. Then roll a d10 and apply the result below. Then move the Regional Crisis Counter back to the "2" box on the Regional Crisis Levels Track.

ROLL (D10)	REGIONAL MAJOR CRISIS
1 or less	Add a Lvl 1 Terror Group in the region.
2	Add "Trending Anti-US" counter to the region's Alignment Track.
3	If there are no Lvl 1 Terror Groups in the Region, add a Lvl 2 Terror Group. If there is a single Lvl 1 Terror Group in the Region, replace it with a Lvl 2 Terror Group. If there are two or more Lvl 1 Terror Groups in the Region, remove two of them and add a Lvl 2 Terror Group.
4	Add a Lvl 1 Terror Group in the region. Roll d10 : **1-4:** Add 1 Russia Influence. **5-10**: Add 1 China Influence.
5	Increase Lvl 2 or 1 Terror Group (in that priority) by one level; If none, add one Lvl 2 Terror Group. Add an Unstable State to the region.
6	Add a Lvl 2 Terror Group in the Region; Flip one Unstable State to Civil War. If none, add one Unstable State to the region.
7-8	Terror Network Deploys; roll a d10 to determine the region: **1-3**: **Eurozone.** Place a Lvl 1 Terror Group in Eurozone. Increase Eurozone Reg. Crises by one box. **4-6**: **Eastern Europe.** Place a Lvl 1 Terror Group in Eastern Europe. Increase Eastern Europe Regional Crises by one box. **7+: CONUS.** Place a Lvl 1 Terror Group in CONUS. Make a Homeland Security Check: **Pass:** No attack but Terror network plans and builds sophistication. Increase highest Lvl Terror Group in CONUS by one Lvl. **Fail:** Roll directly for a Terror Attack on the Domestic Terror Table (*D11*).
9-10	Decrease Regional Stability one box. If there is a US Ally in the region, decrease one Ally relationship (determine randomly, if more than one ally in region) one level. Place a "Trending Anti-US" counter in region. **Possible Refugee Crisis (see note).
11-12	Decrease Regional Stability and set the Regional Crisis to 3 (instead of 2) after resolving this effect; increase the highest-level Terror Group in the region by one Lvl. If there is a US Ally in the Region, decrease one Ally relationship (determine randomly, if more than one Ally in the region) one level. Roll d10 : **1-4**: Add 1 Russia Influence. **5-10**: Add one China Influence. **Possible Refugee Crisis (see note).
13+	Decrease Regional Stability by 1 and set the Regional Crisis to 3 (instead of 2) after resolving this effect. Add Lvl 2 Terror Group and "Trending Anti-US" counter. Then Draw and Resolve a new Terror Card from the Terror Deck. **Possible Refugee Crisis (see note).

DRMs (Max +/-4):

-1/-2/-3 If Regional Stability is 6/7/8 respectively

+2/+1 If Regional Stability is 3/4 respectively

-1 Per "Very Close" US Ally in the region

+1 Per (non-Ceasefire) Civil War in Region

+2 If there is at least one War other than Civil War in the Region

+1 Per Game-Created Rogue State in Region

** **Possible Refugee Crisis:**

- If the region is the Eurozone, there is no refugee crisis.
- If the region is Eastern Europe, Africa, or the Middle East, the expanding crisis creates a flood of refugees fleeing to southern and western Europe. Make a Stability Check for the Eurozone.
  Pass = +1 to Eurozone Regional Crises.
  Fail = +1 to Eurozone Regional Crises and place a "Worsening Economy" counter on the Eurozone SoE.
- If the region is South or Central America, the expanding crisis creates a flood of refugees fleeing to the United States. Place a "Worsening Economy" counter on the US SoE and make a Homeland Security Check.
  Fail = +1 to Domestic Crises.
- If the region is Central/South Asia or Asia/Pacific, the expanding crisis creates a flood of refugees that overwhelm local capacities. Place a -1 AP counter on Russia (for Central/South Asia) or China (for Asia/Pacific) and place a -1 AP counter on ONE US Ally in the region (determine randomly for Asia/Pacific).

WD2 REGIONAL SUMMIT TABLE

When you draw the Regional Summit chit, roll a d10 to randomly select the region for the Summit.

Determine the type of summit by the following criteria (in this priority order):

- If the Regional Crises in the selected region is 2 or higher, or if there is a War, Lvl 4 Terror Group, or any Rogue State in the region, it will be a **Security Summit**.
- If Stability is 4 or less, it will be an **Economic/Trade Summit.**
- Otherwise, it will be a **Global Issues Summit**.

Then make a Regional Alignment Check for that region.
Pass = -1 DRM to roll below
Fail = +1 DRM to roll below

Check the DRMs below the table, then roll a d10 and find the summit's outcome in the column representing the Summit type.

ROLL (D10)	SECURITY SUMMIT	ECONOMIC/TRADE SUMMIT	GLOBAL ISSUES SUMMIT
0 or less	US guarantees training and backing for improved regional security cooperation. -1 to Regional Crises. Reduce one Lvl 3, 2, or 1 Terror Group (in that priority) by one level. Place a "Trending Pro-US" counter on the Alignment Track.	US takes the lead in negotiating a regional trade agreement. Place a "Trending Pro-US" counter in the region. Place a "Trade Agreement Pending" counter in the region. You'll need to use a future action to get Congress to approve the agreement. +1 Regional Stability.	The US position on global issues aligns with the concerns of the majority of this region's nations. Place a "Trending Pro-US" counter in the region. +1 Regional Stability.
1-4	Progress and cooperation on regional issues. -1 to Regional Crises.	Many nations agree to lower tariffs and further open their borders. +1 Regional Stability.	Meaningful dialogue on global issues paves the way for better regional relations. Roll a d10: **1-6**: Decrease Regional Crises by one box. If already at 0, then +1 to Regional Stability. **7+**: Increase Regional Stability by one box.
5-6	Talks yield no progress.	Nationalist, Protectionist sentiments prevail. No progress.	Nationalist agendas torpedo the summit. No progress.
7-8	** China (if only China or both Peers have Influence) or Russia (if only Russia has Influence) provide security guarantees and assistance. -1 to Regional Crises. Place one new Influence counter in the region for the nation that gave the assistance.	** China (if only China or both Peers have Influence) or Russia (if only Russia has Influence) provide trade incentives and development loans. +1 to Regional Stability. Place one new Influence counter in the region for the nation that gave the assistance.	** China (if only China or both Peers have Influence) or Russia (if only Russia has Influence) take the lead on global issues of interest to this region. Place one new Influence counter in the region for the nation that gave the assistance.
9+	No progress; US blamed for not doing more to help. Place "Trending Anti-US" counter in the region. Remove 1 UN Goodwill. If none, -1 to World Opinion of US.	Failure and ill-will. US blamed. Place "Trending Anti-US" counter. Remove 1 UN Goodwill. If none, -1 to World Opinion of US.	US seen as not doing enough to support the global issues that most interest this region. Place "Trending Anti-US" counter Remove 1 UN Goodwill. If none, -1 to World Opinion of US.

DRMs: (+/- 3 Max)

-1/+1 From your Regional Alignment Check, above

-1/-2 If you spent 1 or 2 APs

-1 Per "Very Close" US Ally in the region.

+1 If there is a current War, Lvl 4 Terror Group, or any Rogue State in the region

+1/+2 If there is at least one China or Russia Influence (+2 for both) in the region

** Only if there is at least one China or Russia Influence in the region; otherwise, treat as same as 5-6 result.

WD3 UN ACTION CHART

During each UN ACTS Segment, the UN will take the following four Actions (listed in the chart below with an *):

1. **Humanitarian Aid:**
   Roll a d10 : 1-8, -1 to Regional Crisis in Region with the highest Regional Crisis Level; resolve ties randomly.
2. **Infrastructure Aid:**
   Roll a d10 : 1-5, +1 Regional Stability in Region with the lowest current Stability; resolve ties randomly.
3. **Youth Empowerment:**
   Roll a d10 : 1-5, decrease one Level 2 or 3 Terror Group in the lowest Stability Region by one level; resolve ties by prioritizing Region with a Level 3 Terror Group, then randomly between those Regions.
4. **Civil War Peace Talks:**
   Roll on Broker Peace Table (*see WM4, page 15 WCB*) for either a Civil War or CW Ceasefire in the lowest Stability Region that contains such a counter; resolve ties by prioritizing a Region with a Civil War, then randomly between those Regions.

NOTE: You cannot spend APs or UN Goodwill counters for DRMs.

The UN Action Table
Use this table to resolve both UN Actions and US-Initiated UN Actions.

UN ACTIONS	PURPOSE	NEEDED TO PASS (D10)
HUMANITARIAN AID*	Decrease Regional Crisis in Region by one box	1-8
INFRASTRUCTURE AID*	(Unavailable as a US-requested action.) Increase Stability in Region by one box	1-5
YOUTH EMPOWERMENT*	Decrease one Lvl 2 or Lvl 3 Terror Group in a single region by one level.	1-5
SANCTIONS	Place UN Sanctions on North Korea or Iran.	1-5**
ARMS CONTROL NEGOTIATIONS	Decrease Iran or N. Korea's Nuclear/Missile Track by one box (reversing any Tensions listed in the new lower box). Then roll d10 again to determine whether Russia or China gains an Influence counter in the Region as a result: (8+=no influence) Iran: **1-4**: Place Russia Influence in Central/South Asia **5-7**: Place China Influence in Central/South Asia NK:- **1-5**: Place China Influence in Asia/Pacific **6-7**: Place Russia Influence in Asia/Pacific	1-5 See left
DE-ESCALATE	Decrease a Conflict Track at Conflict Status 3 or 4 by one level (also remove 2 Tensions from each side on a success)	1-5
CIVIL WAR PEACE TALKS*	Attempt to End a Civil War	See Civil War Resolution/ Broker Peace Chart (***WM4***)
BROKER PEACE IN MAJOR WAR	Mediate Peace in a War	1-3***

DRMs:

-# If this is a US-initiated action that you used a UN Goodwill counter to initiate, subtract the value of the UN Goodwill counter

-1 If this is a US-initiated action that you used 1 AP to initiate

+/- If this is a US-initiated action, add or subtract the value in the Upper left of "World Opinion of US" box

*Automatic UN Action during each UN Acts segment on the Turn Sequence

** Subtract the current value of the target nation's Nuclear/Missile Track from the roll.

*** For wars involving Russia or China, use the DRM value of the current US relations with that country as a DRM to the Broker Peace die roll. If the roll is successful, end the war (*see page 21 WCB*), and place a "Trending Pro-US" counter on the Region's Alignment Track.

US-INITIATED UN ACTIONS:

After the mandatory UN Actions, you may choose to perform up to 2 US-Initiated UN Actions, including Actions already performed by the UN (**but not Infrastructure Aid**). Spend an AP or UN Goodwill counter = 1 US-Initiated UN Action.

If you perform two Actions, one of them has to be paid with an AP and the other with a UN Goodwill counter and you may NOT perform the same Action twice. This represents all the ways in which the US partners with regional partners, NGOs, and yes, even UN organizations, subsidiaries, and programs (The Security Council, the WHO, the UN High Commission for Refugees, UNESCO, etc.) to promote peace, health, and stability in the world. You receive a Favorable DRM for your US-Initiated UN Action depending on how you choose to pay for it:

- If you spend 1 AP to get an Action, you get a -1 DRM to your die roll for that Action.
- If you spend a UN Goodwill counter to get an Action, flip it before rolling and use the number on its reverse side as a DRM (this is one reason these counters are valuable, as they will likely give you a better DRM than spending an AP).

WD4 TRADE AGREEMENTS

Diplomatic Action #4 allows you to make a Trade Agreement with one World Region. When you attempt this Agreement, both the region and Congress must agree to it.

Make two die rolls:

1. Select the region, then make an Alignment Check for that region. You may spend up to 2 APs for a -1 DRM per AP spent. If you pass this check, go to Step 2. Otherwise, skip the rest of this procedure.
2. Make a Relations with Congress Check. You may spend up to 2 APs for a -1 DRM per AP spent. If you pass the check, place a "Trade Agreement" counter in the chosen region. If you fail the check, place a "Trade Agreement Pending" counter (back side of Trade Agreement counter) in the region. If you choose this action again in the future for this region, skip step 1.

Immediate Effect:
When you place a "Trade Agreement" counter in a region, place a "Trending Pro-US" counter in the region.

Long-Term Effect:
At the end of each turn, during Step 10 of the End of Turn Cleanup & Consequences, roll a d10 and consult the Trade Agreement Table for each Trade Agreement on the map, based on the Stability of the region. Then implement the result as indicated. This represents ongoing economic benefits and public sentiment changes in both the region and the US.

TRADE AGREEMENT TABLE

	REGIONAL STABILITY			
ROLL (D10)	3-4	5	6-7	8
0-2	Place "Trending Pro-US" counter -1 Public Approval	Place an "Economy Improving" counter on the US SoE Track Place "Trending Pro-US" counter +1 Public Approval	Place an "Economy Improving" counter on the US SoE Track +2 Public Approval Place "Trending Pro-US" counter Remove one Russia or China Influence	Place an "Economy Improving" counter on the US SoE Track +2 Public Approval Place "Trending Pro-US" counter Remove one Russia or China Influence
3-5	-1 Public Approval	Place an "Economy Improving" counter on the US SoE Track Place "Trending Pro-US" counter +1 Public Approval	Place an "Economy Improving" counter on the US SoE Track Place "Trending Pro-US" counter +1 Public Approval	Place an "Economy Improving" counter on the US SoE Track +2 Public Approval Place "Trending Pro-US" counter Remove one Russia or China Influence
6-8	-1 Public Approval	-1 Public Approval	Place an "Economy Improving" counter on the US SoE Track Place "Trending Pro-US" counter +1 Public Approval	Place an "Economy Improving" counter on the US SoE Track Place "Trending Pro-US" counter +1 Public Approval.
9-10	-1 Public Approval Place a "Trending Anti-US" counter	-1 Public Approval	-1 Public Approval	Place an "Economy Improving" counter on the US SoE Track Place "Trending Pro-US" counter +1 Public Approval
11+	-2 Public Approval Place "Trending Anti-US" counter	-1 Public Approval Place "Trending Anti-US" counter	-1 Public Approval	-1 Public Approval

DRMs:
-1 If Current Regional Crises Level is 0 or 1
+1/+2 If there is Russia or China (+1) or both (+2) Influence in the Region

DOES THE TRADE AGREEMENT CONTINUE?

Immediately after you apply the long-term effects of each trade agreement, check to see if the Trade Agreement continues or is cancelled. If any of the following is currently true in a region with a Trade Agreement counter, remove the Trade Agreement counter from the region. Otherwise, the agreement continues and the counter remains in the region:

1. Regional Alignment is less than 5.
2. There are a combined total of 3 or more China and/or Russia Influence in the region.

WD5 SANCTIONS

TARGETING

- You may attempt to apply Sanctions to Russia, China, or the Rogue Nations of Iran and North Korea. (However, if Russia's or China's Relations with the US are at 4 or 5, you cannot attempt to place sanctions on that country.)
- Sanctions can be Unilateral (US only), Multilateral, or UN Sponsored.
- Unilateral and Multilateral Sanctions are applied as Diplomatic Action #7 on the Diplomatic Master Actions Play Aid.
- UN Sanctions are applied as a result of UN Actions.
- UN Sanctions cannot be applied to Russia or China (they are vetoed in the Security Council).
- There may never be more than one Sanctions counter of each type on a target country. For example, if China already bears a Unilateral Sanctions counter, you could attempt to place a Multilateral Sanctions on China, but not another Unilateral Sanctions.

PLACING

When you successfully apply Sanctions to a target nation, randomly draw the appropriate type of Sanctions counter (Unilateral, Multilateral, or UN) and place it number-side-down in the same area on the target country where you place Tensions counters.

APPLYING IMMEDIATE RELATIONS EFFECTS FOR SANCTIONS ON A PEER

If you successfully impose Sanctions on China or Russia, immediately adjust that country's Relations with the US Track as follows:

- For UNILATERAL SANCTIONS: Place a "Trending Anti-US" counter on their Relations with the US Track.
- For MULTILATERAL SANCTIONS: Move their Relations with the US counter one box to the left on their Relations with the US Track.

SANCTIONS EFFECTS:

RUSSIA

- +1 DRM to Increase Strategic Capabilities die roll under Russia Actions Chart (WPR1, Section C) in the World Peer Russia Acts Flipbook, increasing chance of failure.
- +DRM (+1 for Unilateral, +3 for Multilateral) to the Attempt to Improve Russian Economy die roll under World Peer Russia Actions Chart (WPR1, Section E), increasing chance of failure or a worsening economy.

CHINA

- +1 DRM to Increase Strategic Capabilities die roll under China Actions Chart (WPC1, Section C) in the World Peer China Acts Flipbook, increasing chance of failure.
- +DRM (+1 for Unilateral, +2 for Multilateral) to the Attempt to Improve China's Economy die roll under World Peer China Actions Chart (WPC1, Section E), increasing chance of failure or a worsening economy.

IRAN/NORTH KOREA

- DRM on Action Table in the Ally and Rogue States Booklet (Group A for Iran and B for North Korea) equal to net of Tensions and Sanctions. Flip over each Sanction, sum with total of Tensions, and use that number as a DRM. Then put the revealed Sanctions counter(s) back in the appropriate Sanctions holding box and replace them with an equal number of Sanctions of the same type, placed number-side-down so that the new DRMs are hidden until the counters are revealed again.

There are also various cards and events in the game that have an effect based on whether Sanctions are present on a country.

REVEALING SANCTIONS VALUES

When Iran or North Korea activates, you flip their Tensions and Sanctions counters to reveal their numbered sides. You total these numbers (generally the Tensions are positive numbers and the Sanctions are negative numbers) as part of the method for determining the aggressiveness of the country's actions (See Ally and Rogue States Booklet). After the calculation, you place any revealed Sanctions counters back in the holding area (Sanctions-side-up so the numbers are hidden again) and draw an equal number of new Sanctions counters and place them back on the target nation. Note: This "reveal then replace" process for Sanctions allows for ongoing uncertainty about the effect of Sanctions on the target nation. You'll only know for sure how well the Sanctions are performing when you flip them over during the nation's activation.

REMOVAL

- Russia/China: Sanctions are removed as a result of Summits and due to certain Russian or Chinese Actions during the Russia Acts or China Acts segments.
- Iran/North Korea: Sanctions can be removed by Russian or Chinese Actions and by certain results on the Iran and North Korean Action Charts.

When Sanctions are removed, take the Sanctions counter off of the target country and place it back in the Sanctions Holding Area number-side-down so it's ready to be re-selected in the future.

This section of the World Charts contains all the charts that you will use to determine the results of Intelligence and Military actions such as Special Forces Raids, Cyber Attacks, and War.

MILITARY CHARTS

WM1 FOCUSED NATIONAL INTELLIGENCE COLLECTION TABLE

DR (d10)	RESULTS
2 or less	**Effects on Terrorism:** Move a Lvl 3, 2, 1 (in that priority) Terror Group in the region to the "Targeting" box. If there are any remaining Terror Groups in the region that are not in the "Gathering" Intel box or farther, move a Lvl 3, 2, 1 (in that priority) Terror Group in the region to the "Gathering" box. **Effects on War:** (choose 1) **If there is a US or Ally War in the region**, add 2 strength to the US or Ally side in the war (intel provides timely operational advantages) ** OR **If there is a Civil War in the region**, you may choose to share intel with the UN in order to get them to intervene. Make an immediate Broker Peace Talks roll in the UN (see WM4, this is considered a UN attempt) for the chosen Civil War, with an additional -2 DRM.
3-5	**Effects on Terrorism:** Move a Lvl 3, 2, 1 (in that priority) Terror Group in the region that is not in one of the Intel boxes to the "Locating" box. If there are any remaining Terror Groups in the region that are not in the "Gathering" Intel box or farther, move a Lvl 3, 2, 1 (in that priority) Terror Group in the region to the "Gathering" box. **Effects on War:** (choose 1) **If there is a US or Ally War in the region**, add 1 strength to the US or Ally side in the war (intel provides timely operational advantages) ** OR **If there is a Civil War in the region**, you may choose to share intel with the UN in order to get them to intervene. Make an immediate Broker Peace Talks roll in the UN (see WM4, this is considered a UN attempt) for the chosen Civil War, with an additional -1 DRM.
6-8	**Effects on Terrorism:** Move a Lvl 3, 2, 1 (in that priority) Terror Group in the region that is not in one of the Intel boxes to the "Locating" box.
9+	**Effects on Terrorism:** Move a Lvl 3, 2, 1 (in that priority) Terror Group in the region that is not in one of the Intel boxes to the "Gathering" box.

DRMs (+/-2 Max):

-1 If US Strategic Recon/Intel Gathering Strategic Capability is higher than both Russia's and China's

-1 If US Space Warfare Strategic Capability is higher than both Russia's and China's

+1 If Russia or China has at least one influence in the region and their Space Warfare Strategic Capability is greater than that of the US

** If you use this Intel to help an Ally in a War, you may automatically and immediately improve your relationship with that Ally by one level if the relationship is less than "Very Close."

WM2 SOF RAID AND STRIKE CHARTS

#1 SOF RAID TABLE

A Raid can only be launched against a Terror Group that occupies the "Target Fixed" box of a World Region's Intel Track.

ROLL (D10)	RESULTS
0 or less	****We Got Him! High value terror leader killed; survivors scatter.** Decrease Terror Group by TWO levels. Move Terror Group to the "Gathering " box on the Intel Track. +3 Pub. Approval*; +1 Legacy Point.* Use captured intel to make an immediate Intel Attempt against 1 other Terror Grp in region. (If it is a Joint Raid with an Ally, the Intel attempt is an automatic success.) Then choose either: a) -1 Regional Crises; b) +1 AP.
1-2	** **Major Success, survivors scatter.** Decrease Terror Group by TWO levels. +1 Public Approval.* Move Terror Group to the "Gathering" box on the Intel Track. Use captured intel to make an immediate Intel Attempt against one other Terror Group in region.
3-5	**Success.** Decrease Terror Group by ONE level. Move Terror Group to the "Gathering" Box on the Intel Track.
6-7	**Success with casualties.** Decrease Terror Group by ONE level. Move Terror Group to the "Gathering" box on the Intel Track. -1 Public Approval. *
8	**Terrorists alerted and move at 11th hour; mission recalled without publicity.** Move Terror Group to the "Locating Target" box on the Intel Track.
9+	**Failure with many casualtie**s. -2 Public Approval*. Move Terror Group to the "Gathering" box on the Intel Track. -1 Legacy Point.* If US conducted Raid, roll d10: On a **5+**, either a) Fire and Replace (from 3 random options) the Sec Def., or b) -1 Party Relations; -1 RWC; -1 Media Relations.

DRMs (For Both US and Joint Raids)

-1 If there is a US Special Ops and a US Intel counter in region (no additional effect if you have more)

-1 If there is a Focused National Intel counter in the region

-2 If it is a UK, NATO, or Joint Ally Raid in Eurozone or Eastern Europe

-2 If it is an Israeli Raid

+1 If target is Lvl 3 or Lvl 4 Terror Group

+1 If there are a combined total of 3+ Russia and/or China Influence in the Region

*=Public Approval adjustments and Legacy Point Award only apply if this is a US Raid, not a Joint Action.

**=If this is a Joint Action with an Ally, US earns +1 UN Goodwill

#2 AIRSTRIKE/DRONE STRIKE TABLE

Choose a Terror Group in the "Locating" or "Target Fixed" box in a region other than the Eurozone. Then choose whether you want to perform an airstrike or a drone strike and roll a d10.

ROLL (D10)	RESULTS
1 or less	**Surgical Strike kills key Terror leaders; survivors scatter.** Decrease Terror Group by one level (2 if an airstrike). +1 Public Approval if target Lvl 1 or 2; +2 Public Approval if target Lvl 3 or 4. Move Terror Group to the "Gathering" box on the Intel Track.
2-4	**Strike is effective, with no collateral damage.** Decrease Terror Group by one level (2 if an airstrike). Move Terror Group to the "Gathering" box on the Intel Track.
5-6	**Strike is effective, but causes civilian casualties.** Decrease Terror Group by one level (2 if an airstrike). Place a US Military Footprint counter in the region. -1 Public Approval. (If airstrike, -1 UN Goodwill, or, if none to lose, place a "Trending Anti- US" counter in the region.)
7	**Unable to Identify and Attack Target, or proximity to civilians prevents attack.** No Losses or Effects.
8+	**Strike is ineffective and causes civilian casualties.** Place a US Military Footprint counter in the region. -2 Public Approval. (If airstrike, -1 UN Goodwill, or, if none to lose, place a "Trending Anti-US" counter in the region. Also, US aircraft pilot goes missing: +1 Tension to POTUS/Cabinet Focus (6 to 1). -1 Public Approval.)

DRMs (+/- 2 Max)

-1 If at least one US Intel counter is in the Region

-1 If there is a Focused National Intel counter in the region

-1 If target Terror Group is in the "Target Fixed" box of the Intel Track

+1 If no USAF unit is in the region

+1 If there are a combined total of 3+ Russia and/or China Influence in the Region

WM3 CYBERATTACKS

In *Mr. President*, cyberattacks represent the will and capability of various nations to use a variety of means (electronic, space, cyber, and multi-spectrum) to disrupt and weaken the command control, computer systems and electronic-reliant infrastructure of an enemy or peer competitor. The game's cards and charts control the cyber actions of peer competitors, Rogue states, and allies. You control the cyberattacks of the United States.

You are limited to ONE Cyberattack per target nation per activation phase. (Place a "Cyberattack Used" counter on the enemy to keep track.) There are a number of times during the game when you might want/need to use a cyberattack:

1. **When you join with an Ally in a Joint cyberattack.** This occurs when your ally rolls "Cyberattack vs <target>" as their Unilateral Action or as part of the War Progress Roll of a US War involving an Ally. Treat as if the US initiated the cyberattack.
2. **When you wish to attack the Nuclear/Missile Track/ Critical Infrastructure of North Korea/Iran OR when you wish to attack the Russian Economy OR when you wish to attack the Critical Infrastructure of Russia/ China.** It requires using an "Initiate Hostilities" action (Military Master Action #6).
3. **When you wish to attack a Rogue State via Cyberattack.** It requires using an "Initiate Hostilities" action (Military Master Action #6).
4. **Before any US War Progress Roll (including at the onset of a war starting during an Activation Phase),** you may make one Cyberattack against a valid target unless you already attacked it this Activation Phase (target a Rogue State or the Critical Military and Gov. infrastructure).
5. **Before any War Progress Roll involving China or Russia,** they may perform a Cyberattack using the special row at the bottom for "China or Russia at War".

CYBERATTACK TABLE

To perform a Cyberattack, choose your target, then roll a d10 and modify by the DRMs at the bottom of this table. Refer to the "Results" column for the chosen target and apply the result of the attack. Then roll again to determine potential Response to the attack (the only DRMs to this 2nd roll would be listed in results from the 1st roll). Find the die roll result in one of the four "How Target/Russia/China/ World React" columns for that target. Apply the Response. That concludes your Cyberattack.

TARGET	RESULTS	HOW TARGET/ RUSSIA/CHINA/ WORLD REACT (D10) 2 OR LESS	HOW TARGET/ RUSSIA/CHINA/ WORLD REACT (D10) 3-6	HOW TARGET/ RUSSIA/CHINA/ WORLD REACT (D10) 7-9	HOW TARGET/ RUSSIA/CHINA/ WORLD REACT (D10) 10+
Rogue State	**2 or less**: If Rogue State is at war, subtract 2 from its strength. Otherwise, decrease a Terror Group in the region by two levels or two Terror Groups by one level each. -2 DRM to Reaction roll. **3-9:** Attack Disrupts Rogue State Funding and Recruitment Operations. Decrease a Terror Group in the region by one level. **10+**: Rogue State detects and counters attack. Possible US Embarrassment. +3 to Reaction Roll.	No Reaction. A flawless and covert operation that leaves no fingerprints.	Rogue State accuses US of Cyberattack. Most of the world has no reaction. Many privately thank the US for its efforts. +1 Public Approval. Roll a d10 and place a Tensions counter on either: 1-4: Iran 5-7: N. Korea 8-9: Russia 10: China	Rogue State launches videos that show suffering of non-combatants and blame US for electrical and water supply failures that caused the suffering. Regional Propaganda win for the Rogue State. Place a "Trending Anti-US" counter in the region. -1 Public Approval.	Russia and China accuse the US of "warmongering" and hammer that message on social media around the world. Place a Worsening counter on both China and Russia's "US Relations" track. Place a "Trending Anti-US" counter in the region. -1 Public Approval. -1 UN Goodwill counter (if none to lose, -1 World Opinion of the US).

Contd

TARGET	RESULTS	HOW TARGET/ RUSSIA/CHINA/ WORLD REACT (D10) 2 OR LESS	HOW TARGET/ RUSSIA/CHINA/ WORLD REACT (D10) 3-6	HOW TARGET/ RUSSIA/CHINA/ WORLD REACT (D10) 7-9	HOW TARGET/ RUSSIA/CHINA/ WORLD REACT (D10) 10+
Iran Nuclear/ Missile Track	**2 or less**: Major Success! Decrease the Nuclear/Missile Track by one box. -2 DRM to Reaction roll. **3-6:** Attack causes near-term issues and temporary Setbacks. Place a "Can't Increase this Turn" counter on the Nuclear/Missile Track. **7-9**: No Effect. **10+**: Iran detects and publicizes attack. +3 to Reaction Roll.	No Reaction. A flawless and covert operation that leaves no fingerprints.	Iran incensed but uncertain. They (think they) know that you (or Israel) did it, but have no proof. +1 Tensions on both Iran and Israel. Roll a d10: **1-5:** No further effect. **6+:** Iran increases subversion efforts in ME as a result. Increase one Lvl 1,2,or 3 (in that priority) Terror Group in the Middle East.	Iran knows you (or Israel) did it and they tell the Russians and the Chinese. +1 Tensions on Iran, Israel, China, and Russia. Roll a d10 and apply +1 to either: **1-5:** Israel/Iran Conflict Track **6+:** US/Iran Conflict Track Roll d10: **1-3:** No further effect. **4+:** Iran increases subversion efforts in ME as a result. Place one "Iranian Influence" counter in the ME (see "Iran Influence" in the GM). Increase one Lvl 1, 2, or 3 (in that priority) Terror Group in the Middle East.	Russia and China each denounce US interference in the affairs of their ally. Place a Worsening counter on both China and Russia's "US Relations" track. +1 Tensions on Iran, Israel, China, and Russia. Roll a d10 and apply +1 to either: **1-5:** Israel/Iran Conflict Track Status **6+:** US/Iran Conflict Track Status Iran increases subversion efforts in ME as a result. Place one "Iranian Influence" counter in the ME (see "Iran Influence" in the GM). Increase one Lvl 1, 2, or 3 (in that priority) Terror Group in the Middle East.
Iran Critical Military and Government Infrastructure	**3 or less**: Major Success! Adjust Relative Strength on all three of Iran's Conflict Tracks by one in the US/Israel/SA/GS's favor. -2 DRM to Reaction roll. **4-7:** Crises at home decreases Iranian destabilization attempts abroad. Remove one Iranian Influence counter (your choice) from the Middle East and decrease one Lvl 3, 2, or 1 Terror Group (in that priority) in the ME. **8-9**: No Effect. **10+**: Iran detects and publicizes attack. +3 to Reaction Roll.	No Reaction. A flawless and covert operation that leaves no fingerprints.	Iran incensed but uncertain. They (think they) know that you (or Israel) did it, but have no proof. +1 Tensions on both Iran and Israel. Roll a d10: **1-5:** No further effect. **6+:** Iran increases subversion efforts in ME as a result. Increase one Lvl 1, 2, or 3 (in that priority) Terror Group in the Middle East. Roll a d10: **3 or less**: Place a China influence counter in Asia/Pacific. **4-6**: Place a China Influence counter in Central/South Asia **7-8**: Mobilize. Roll a d10: Increase either the China/Japan Conflict Track (1-6) or the China/India Conflict Track (7-10) by one box. **9+**: Increase China's Posture to 2 and improve Relative Strength vs. Japan by one box. If already at 2, place a China Influence counter in both Asia/Pacific and Central/South Asia and improve Relative Strength vs. Japan by one box.
China or Russia at War (DRMs below apply, but China or Russia advantage provides – DRMs and US advantage + DRMs for this roll only)	Roll represents the strength you add to the Russia/China side in the War Resolution. Roll a d10 to follow: **3 or less**: +3 strength **4-6**: +2 strength **7-8**: +1 strength **9+**: No change	No further effect or response.	No further effect or response.	No further effect or response.	No further effect or response.

DRMs to "Results" die roll (+3/-4 max):

+# (up to +3) To match the difference if Russia OR China has a greater Cyber Strategic Capability than the US

-# (up to -3) To match the difference if the US has a greater Cyber Strategic Capability than both Russia and China

(For both of the drm calculations above, "difference" is based on the highest of the two Peer countries' Cyber ratings.)

-1 If attack against North Korea, Iran, or a Rogue State

-1 If this is a joint attack with an Ally (-2 if Israel)

NOTE: The "difference vs Russia or China" DRMs apply to ALL US or US Ally attacks, not just attacks against Russia or China. The game assumes that the Russians and Chinese will share much of their technology with those they support and that their capabilities would be used to attempt to detect and thwart US attacks.

WM4 CIVIL WAR

CIVIL WAR RESOLUTION/BROKER PEACE TABLE

You will have to roll on this table during the UN Acts Segment (for specific Civil Wars chosen by the UN or the US) as well as during the War Progress Segment (for all Civil Wars). Roll a d10 and use the approriate column based on the Civil War status.

ROLL (D10)	CIVIL WAR	CEASEFIRE
2 or less	**Ceasefire***. Replace Civil War counter with CW Ceasefire. Decrease Regional Crises by one box. Place UN Peacekeepers under the CW Ceasefire counter. Remove an Iranian Influence Counter next to this Civil War, if present.	**Permanent Peace.*** Remove Civil War Ceasefire counter (and any UN Peacekeepers and Iranian Influence counter next to this Civil War, if present). Decrease Regional Crises by one box.
3-4	**Ceasefire**. Replace Civil War counter with Civil War Ceasefire. Decrease Regional Crises by one box.	**Permanent Peace but Nation is Fragile.** Remove Civil War Ceasefire counter (and any UN Peacekeepers and Iranian Influence counter next to this Civil War, if present). Decrease Regional Crises by one box. Place an Unstable State counter in the region.
5-7	**Fighting continues**. No further effect.	**Fragile Peace.** No change to Civil War Ceasefire counter.
8-9	**Fighting Intensifies.** Increase Regional Crises by one box.	**Renewed Fighting.** +1 Regional Crises. Replace CW Ceasefire counter with a Civil War counter. Remove any UN Peacekeepers under the CW.
10+	**Fighting Intensifies.** +1 to Regional Crises. Then refer to the Possible Refugee Crisis results of the Regional Major Crisis Table (WD1) and determine the results depending on the location of the crisis.	**Renewed Fighting.** +1 Regional Crises. Replace CW Ceasefire counter with a Civil War counter. Remove any UN Peacekeepers counter under the CW. Increase highest-level Terror Group in region by one level.

DRMs:

-1 If this is a UN attempt

-1 If you spent 1 AP during the UN Acts Segment to trigger a roll for a specific Civil War

-x If you spent a "x" UN Goodwill counter during the UN Acts Segment to trigger a roll for a specific Civil War

-1 If you spent 1 AP on a specific Civil War during the War Progress Segment

-2 (Ceasefire column only) If there is a UN Peacekeepers counter under the Civil War Ceasefire counter

+1 If Regional Stability is <5

+1 If there is an Iranian Influence (+1) counter beneath the Civil War (or CW Ceasefire) counter

* If 1 AP was spent to perform/improve this roll, gain one UN Goodwill counter.

WM5 WAR PROGRESS

Wars may break out at one point or another during the game. Wars are first split into their level of US involvement.

US Wars: The US is fully involved in these wars. You decide how many units you want to commit to the war and these wars will reap you the greatest benefits from winning but also incur the greatest penalties from losing. A US war dragging out will generally have a negative impact on you.

Ally or US-Supported Wars: Even if not directly involved, the US is clearly taking a side in these wars, either in favor of an Ally (in game terms) or a country that has traditionally been supported by the US. No US units are committed to the war per se, but you will still reap benefits if the Ally/US-Supported country wins the war or suffer penalties if they lose.

Special War: Only one such war currently exists in the game: Russia going to war against a Rogue State in Eastern Europe or Central/South Asia. If this war ever breaks out, the US stays completely out of it but the game mechanics are still used to determine who comes out on top.

Below is a table that lists every possible war in the game with the following information:

- The two sides involved:
  - For Ally or US-Supported Wars, the Ally or US-Supported Country is listed in the "Side A" column.
- The war's trigger, i.e. what game effect starts this specific war.
- The Conflict Type, either Combined Air/Ground or Air/Missile.
- The Region the war is in. This is important for some game effects such as placing Military Footprints at the end of the Turn.
- Additional Info:
  - If a side is always the attacker in a war, it will be specified here.
  - Some wars will give you an option to involve US forces or not and will thus be listed twice in the table (under US Wars if you decide to intervene and under Ally or US-Supported Wars if you don't). They are color-coded so you can know at a glance they're the same war.

US WARS

SIDE A	SIDE B	TRIGGER	INITIAL CONFLICT TYPE	REGION	ADDITIONAL INFO
US or US+NATO (see Additional Info)	Rogue State	Military Action #6	Combined Air/Ground	Region with the Rogue State counter	US is always the attacker (roll for Surprise). If Rogue State is in Eastern Europe or Eurozone, NATO's relationship has to be Very Close for war to be declared and NATO's Strength is added to US (Side A would thus become US+NATO).
US	Iran	Conflict Track #10	Combined Air/Ground	Middle East	
US+ROK	DPRK	Conflict Track #6	Combined Air/Ground	Asia Pacific	Will trigger game loss if DPRK has nuclear weapons.
US+NATO	Serbia	Event #136	Combined Air/Ground or Air/Missile (See Event)	Eastern Europe	US+NATO are always the attacker with Surprise.
Taiwan+US	China	Event #44	Combined Air/Ground	Asia Pacific	China is always the attacker.

Contd

SIDE A	SIDE B	TRIGGER	INITIAL CONFLICT TYPE	REGION	ADDITIONAL INFO
Ukraine+US+NATO	Russia	Event #45	Combined Air/Ground	Eastern Europe	Can only start if Conflict Track #4 is not at War already. Set Conflict Track #4 to War. Russia is always the attacker. Roll a die at the end of every War Progress roll: on a 9-10, you lose the game!
Balkan States+US +NATO	Serbia+ Russia	Past is Prologue World Events #6	Combined Air/Ground	Eastern Europe	Serbia+Russia are always the attacker with Surprise. Ignore Event #136 (do not draw a replacement) while War is ongoing. See Past is Prologue World Event #6 when the war ends instead of usual war ends consequences.

ALLY OR US-SUPPORTED WARS

(Ally or US-Supported Country always listed in the "Side A" column.)

SIDE A	SIDE B	TRIGGER	INITIAL CONFLICT TYPE	REGION	ADDITIONAL INFO
India	China	Conflict Track #1	Combined Air/Ground	Central/South Asia	
India	Pakistan	Conflict Track #2	Combined Air/Ground	Central/South Asia	If a 9-10 result has been rolled on Event #133, see India vs Rogue State below.
India	Pakistan	India Action Table	Combined Air/Ground	Central/South Asia	India is always the Attacker. India receives -2 DRM instead of the usual -1 DRM for Surprise.
Ukraine	Russia	Conflict Track #4	Combined Air/Ground	Eastern Europe	
Israel	Iran	Conflict Track #7	Combined Air/Ground	Middle East	Will trigger game loss if Iran has nuclear weapons.
Israel	Iran	Iran Action Table, result 14+	Air/Missile	Middle East	Iran is always the attacker. Will trigger game loss if Iran has nuclear weapons.
Israel	Iran	Israel Action Table, result 14+	Air/Missile	Middle East	Israel is always the attacker with Surprise. Will trigger game loss if Iran has nuclear weapons.
Israel	Neighbors (Hezbollah, Hamas, Egypt)	Conflict Track #8	Combined Air/Ground or Air/Missile (See Track)	Middle East	See Conflict Track to determine Side B participants.
Israel	Neighbors (Hezbollah, Hamas)	Iran Action Table, result 12-13	Combined Air/Ground	Middle East	Hezbollah/Hamas are always the attackers. Set Conflict Track #8 to War. If at War already, roll as specified to add Hezbollah or Hezbollah/Hamas (if they're not involved already) to the existing war (do not change the Conflict Type).

Contd

SIDE A	SIDE B	TRIGGER	INITIAL CONFLICT TYPE	REGION	ADDITIONAL INFO
Israel	Neighbors (Hezbollah, Hamas)	Israel Action Table, result 13	Combined Air/Ground	Middle East	Israel is always the attacker with Surprise. Set Conflict Track #8 to War. If at War already, add the rolled Adversary to the existing war if it's not involved already (do not change the Conflict Type).
Israel	Neighbors (Hezbollah)	Event #108	Combined Air/Ground	Middle East	Set Conflict Track #8 to War. If at War already, add Hezbollah to the existing war if it's not involved already (do no change the Conflict Type).
GS/SA	Iran	Conflict Track #9	Combined Air/Ground	Middle East	
GS/SA	Iran	GS/SA Action Table, result 9-11	Air/Missile	Middle East	GS/SA is always the attacker.
GS/SA	Yemen	GS/SA Action Table, result 12+	Combined Air/Ground	Middle East	GS/SA is always the attacker.
India	Rogue State	Event #133	Combined Air/Ground	Central/South Asia	Ignore 9-10 result if India is already at War with Pakistan. If a 9-10 is rolled for the Event, the Rogue State (as long as it's in play) replaces Pakistan on the India/Pakistan Conflict Track for the rest of the game. India is always the attacker.
Taiwan	China	Event #44	Combined Air/Ground	Asia Pacific	China is always the attacker.
Ukraine	Russia	Event #45	Combined Air/Ground	Eastern Europe	Can only start if Conflict Track #4 is not at War already. Set Conflict Track #4 to War. Russia is always the attacker.
Balkan States	Serbia+ Russia	Past is Prologue World Events #6	Combined Air/Ground	Eastern Europe	Serbia+Russia are always the attacker with Surprise. Ignore Event #136 (do not draw a replacement) while War is ongoing. See Past is Prologue World Event #6 when the war ends instead of usual war ends consequences.

SPECIAL WAR

SIDE A	SIDE B	TRIGGER	INITIAL CONFLICT TYPE	REGION	ADDITIONAL INFO
Russia	Rogue State	Russia Acts, G5, result 1-3	Combined Air/Ground	Region with the Rogue State counter	Russia is always the attacker. Russia receives -2 DRM instead of the usual -1 DRM for Surprise.

STARTING A WAR

Go through the following steps when a War starts:

- If this would be the sixth ongoing war, you lose the game!
- Place a Conflict Type counter (Combined Air/Ground or Air/Missile) in the "Type of Conflict" box on the War Status Track.
- Place a Conflict Status counter on the "Stalemate" box of the Status of Conflict area.
- If the War trigger did not specify who was the attacker/defender between the two sides, determine the attacker randomly.
- Place a "Country at War" counter showing the name of each side in the appropriate Attacker (blue)/Defender (red) areas of the Conflict Track, depending on which country is the Attacker and which is the Defender.
- Non-US countries add a specific Strength value to the War. Find the name of the country in the table below and place numerical counters in either/both "Strength/Forces" boxes to take their Strength into account. Some countries have a different value listed in parentheses for Air/Missile Wars. If they do, be sure to use the correct one for the Conflict Type you are setting up. If they don't, their Strength remains the same no matter the Conflict Type.

Also take into account that Adversaries and Peers (in red in the Strength Table) get a +1 Strength bonus if you're playing on Normal Difficulty and a +3 Strength bonus if you're playing on Harder Difficulty.

STRENGTH TABLE

ALLIES OR US-SUPPORTED COUNTRIES	STRENGTH (AIR/MISSILE)	ADDITIONAL INFO
Balkan States	4	
Gulf States/Saudi Arabia	5	
India	7	
Israel	8 (6)	
NATO	8 (5)	
ROK (South Korea)	6	
Taiwan	3	
Ukraine	5	
PEERS*	**STRENGTH (AIR/MISSILE)**	**ADDITIONAL INFO**
China	10	+2 per China Influence in the War's Region
Russia	10	+2 per Russia's Influence in the War's Region
ADVERSARIES*	**STRENGTH (AIR/MISSILE)**	**ADDITIONAL INFO**
DPRK (North Korea)	6	
Egypt	5	
Hamas	2	
Hezbollah	3	+1 per Iranian Influence next to Israel
Iran	6 (3)	
ISIS (see Sandbox Scenario setup)	4	
Pakistan	5	
Rogue State (Level 1-2-3-4)	4-5-6-7	
Serbia	3 (2)	
Taliban (see Sandbox Scenario setup)	6	
Yemen	3	

*** Add 1 to Adversaries' and Peers' Strength if playing on Normal Difficulty or 3 if playing on Harder Difficulty.**

- If this war was triggered/is governed by a Conflict Track, set it to War if it isn't already and add numerical counters equal to the "Relative Strength" value next to the Conflict Track to the side favored.

  For example, if the India/China Conflict Track just reached the War box and the Relative Strength is at +2 in favor of China, you would add a "2" counter in China's "Strength/Forces" box (Attacker or Defender).

- Place a War counter (1-5) in the Region where the War is being fought (see table above).
- Make a War Progress roll (see below) with the exception that you ignore a "single asterisk" result.

PROGRESSING A WAR

Go through these steps for every ongoing War during a War Progress Segment or for a specific War that just started.

- If Russia/China is involved in the War, they immediately perform a Cyberattack to try to bolster their Strength in the War. If this is a US War, you also get a free Cyberattack unless you already performed a Cyberattack against the target during this Activation Phase OR unless you are currently in the Special Activations Phase. Each Rogue State is considered a distinct target for this purpose. See WM3 for details.
- **US Wars only:** Determine US Strength. The US Strength is dynamic based on the units currently able to project force in the War's Region.
  - □ Combined Air/Ground War
    - ▫ All US Units in the Region's US Forces Holding Box (Army Hvy units only count if they are not on their "In Transit" side).
    - ▫ Carrier/USMC Units in a CVBG Deployment Zone connected to the Region (see outline to the right).
    - ▫ Strength of UN Regional Troops (if present).
    - ▫ +4 if the War is NOT in Eastern Europe or Central/South Asia (US attack subs).
    - ▫ Strength counters provided by game effects (if present).
  - □ Guerilla War
    - ▫ All US Units in the Region's US Forces Holding Box (Army Hvy units only count if they are not on their "In Transit" side). If playing on Normal or Harder, Army Hvy units only provide 3 Strength each.
    - ▫ Carrier/USMC Units in a CVBG Deployment Zone connected to the Region (see outline below).
    - ▫ Strength of UN Regional Troops (if any are present).
  - □ Air/Missile War
    - ▫ All USAF/Carrier units in the Region's US Forces Holding Box.
    - ▫ Carriers in a CVBG Deployment Zone connected to the Region (see outline below).

LIMITED NAVAL REACH ON NORMAL/HARDER

When playing on Normal/Harder, unless the US Naval Forces Training and Tech Strategic Capability is at 4 or higher (5 or higher if playing on Harder), each Carrier and USMC unit located in a CVBG Deployment Zone can only provide their Strength to a single Region during a given War Progress Segment.

Temporarily move each unit on the line connecting the CVBG Deployment Zone to the selected Region. At the end of the War Progress Segment, move all Carriers and USMC units on those lines back to the connected CVBG Deployment Zone.

- +1 to Regional Crises in the War's Region. If this is a US War, also place one US Military Footprint counter in the War's Region.
- Total up the Strength of each side by adding all numerical counters and the US Strength if this is a US War. If one side has zero Strength at this point, they immediately lose the War (proceed to "Ending a War" below).
- Express the Attacker's Strength vs Defender's as an odds ratio, rounding down fractions in favor of the Defender to match a column on the War Combat Table (WCT1).

  For example, a 13-5 Attacker-Defender Strength would be rounded down to a 2:1 ratio.

- Under the relevant Conflict Type on the War Combat Table (WCT1), determine any applicable DRMs to the ensuing War Progress roll (for Surprise, type of Units involved, etc.).
- Roll a d10, apply DRMs, and find the result on the War Combat Table (WCT1) under the appropriate odds column in the row whose color matches the Conflict Type (the Brown row for a Combined Air/Ground War, for example). If you rolled a natural 1 or a natural 10 in a War involving a Rogue State who possesses a WMD, refer to the bottom of the War Combat Table (WCT1). Possible War Progress Roll results are:
  - □ **Losses:** Apply losses to the specified side (Attacker or Defender).
    - ▫ If the US IS NOT on the side incurring losses: reduce the Strength of that side by the amount of losses incurred (i.e. adjust the numerical counters in the "Strength/Forces" box).
    - ▫ If the US IS on the side incurring losses: the game assumes the US replaces losses at a cost in support at home. -2 Public Approval. Then make both a Relations with Media check and a RWC Check. For each you fail, -1 to that Rating.
  - □ **NO MOVE:** The Conflict Status counter does not move.
  - □ **1 Left, 2 Left, 1 Right, 2 Right:** Move the Conflict Status counter the specified number of boxes in the specified direction. If this is a Combined Air/Ground War, move only along the topmost 1-5 blue boxes. If not, zigzag between the topmost 1-5 blue boxes and

the blue/black boxes labeled "Air/Missile or Guerilla Wars" (these Wars take longer to resolve in the game).

Following the move, if the Conflict Status counter is in either the "Attacking Forces Win" or "Defending Forces Win", that side wins the War. Proceed to "Ending the War".

If the Conflict Status counter ends up in the "Attacking Forces Win" AND would be entitled to another Move (i.e. a "2 Left" result was achieved but the counter only moved one box) AND a Rogue State lost the War, this is considered a Crippling Loss. Proceed to "Ending the War".

Otherwise, keep following these steps.

- If one side has zero Strength at this point, they immediately lose the War (proceed to "Ending a War" below).
- Asterisk results:
  - □ **Single asterisk:** UNLESS this is the initial War Progress Roll of a War that just started, both sides are spent and agree to a peace. Proceed to "Ending the War". Otherwise, keep following these steps.
  - □ **Double asterisk:** If this is a Combined Air/Ground War, move the Conflict Type counter to Guerilla War.
  - □ **Triple asterisk:** Counterattack! After applying potential moves and losses, swap the Attacker and the Defender and "mirror" the Conflict Status marker (e.g. if the marker was on the "Defending Forces Winning" box, place it on the "Attacking Forces Winning" box). See a before/after illustrated example on p.47 in the Governing Manual.
- If you made it all the way here, it means the War is not over yet! Another War Progress Roll will be made in the next War Progress Segment. If this is a US War:
  - □ You may immediately spend two APs to increase military spending for the war effort and to promote public support for the war.

    If you do:
    Add 1 to the US side's Strength.
    Make an SoE check. If you pass, place an "Improving Economy" counter on the US SOE Track.

    If you don't:
    -2 Public Approval.
    Place a Tensions counter on the POTUS/Cab Focus (6 to 1).
    Make an SoE check. If you fail, place a "Worsening Economy" counter on the US SoE Track.

ENDING A WAR

A War can end through various means:

1. One side reaches the "Attacking Forces Win" or "Defending Forces Win" box. That side is considered as having won the war and the other side is considered as having lost the war.
2. One side has a Strength of zero before or after the War Progress Roll.
3. An Asterisk result is obtained on a War Progress Roll other than the initial one.
4. Some Ally/Rogue results or Peer Actions direct you to end the War.
5. Diplomatic Master Action #9 allows you to end a War.
6. The use of a WMD by a Rogue State against Russia.

Cases 3-4-5 are covered at the end of this section. No side is considered the winner or the loser in these cases.

Case 6 is covered at the end of the War Combat Table (WCT1) and supersedes this section.

Go through every relevant section that apply to the War that just ended in the listed order.

ROGUE STATE WINS

- Increase the Rogue State by one level.
- Place two Unstable States in the War's Region.

ROGUE STATE LOSES

- -1 to Regional Crises in the War's Region.
- If the Rogue State suffered a Crippling Loss (see **"1 Left, 2 Left, 1 Right, 2 Right"** above):
  - □ Eliminate it altogether if it was Level 1 or Level 2 (i.e. do not replace it with a Terror Group).
  - □ Reduce it by 2 Levels If it was a Level 3 or Level 4 (it remains in the Region).

  In both cases, the War still ends and you skip the rest of the "Rogue State Loses" section.
- If the Rogue State was Level 3 or 4, it disperses but its size and sophistication allow it to relocate material and personnel resources and live on in two smaller groups. Remove the Rogue State and replace it with 2 new smaller Rogue States in the same Region:
  - □ Level 3 Rogue State: 2x Level 1 Rogue States.
  - □ Level 4 Rogue State: 1x Level 2 and 1x Level 1 Rogue State.
- If the Rogue State was Level 1 or 2, roll a d10 with a -2 DRM if the Rogue State was Level 1:
  - □ 1-6: The Rogue State's sophisticated infrastructure and online recruiting/communications capabilities allow it to continue to function as decentralized but organized Terror Groups. Replace the Rogue State with one Level 2 Terror Group. If the Rogue State was Level 2, also place one Level 2 Terror Group in two other random Regions.

    You may immediately make two Intel rolls in any Region(s), with a -1 DRM in addition to any other normal DRMs for Intel attempts.
  - □ 7+: The Rogue State is depleted but a Guerilla War continues. Move the Conflict Status counter back to

the "Attacking Forces Winning" box. Set the Conflict Type to Guerilla War if it wasn't already. If the Rogue State was Level 2, decrease it to Level 1 and reset its Strength to 4 in its Strength/Forces box. If the Rogue State was Level 1, reset its Strength to 2 in its Strength/Forces box. In either case, adjust the Strength by +1/+3 if playing on Normal/Harder Difficulty Level. That War is not over, skip the rest of the "Ending a War" section!

US WINS (US WARS ONLY)

- +2 Public Approval, +1 Media Relations, +1 Party Relations.
- +1 Relations with Congress (not vs a Rogue State).
- +2 Legacy Points (+1 vs a Rogue State, unless it suffered a Crippling Loss, in which case +2).
- Place a "Trending Pro-US" counter in the Region.
- You may immediately perform a single "Move or Deploy US Military Forces" action (Military Master #3) with units from this Region.

US LOSES (US WARS ONLY)

- -6 Public Approval. -1 Relations with Congress. -1 Media Relations. -1 Party Relations. -1 Presidential Prestige.
- Decrease Regional Alignment by one box in the War's Region.
- If there are any Allies in the War's Region, -1 to Ally Relationship with each of them.

US ALLY WINS (ALLY WARS ONLY)

- Place a +1 AP counter on the Ally.
- +1 Public Approval.
- If the Ally Relationship is Very Close, +1 Legacy Point. Otherwise, improve the Ally Relationship by one level.

US ALLY LOSES (ALLY WARS ONLY)

- -3 Public Approval.
- Set that Ally Relationship to Estranged.
- Place a -1 AP counter on that Ally.

RUSSIA/CHINA WINS

- Add one of the winning Peer's Influence counter to the War's Region.
- Place a +1 AP counter on the winning Peer.

RUSSIA/CHINA LOSES

- Remove one of the losing Peer's Influence counter from the War's Region.
- Place a -1 AP counter on the losing Peer.

DPRK WINS

- Decrease Regional Alignment by one box in Asia/Pacific.
- Place one China Influence counter in Asia/Pacific.

IRAN WINS

- Add one "Iran Influence +1" counter in the Middle East following the priorities outlined in the Governing Manual.

DPRK OR IRAN LOSE

- If Iran lost, remove one Iran Influence counter of your choice.
- Place a -1 AP counter next to the losing country.
- Decrease the losing country's Nuclear/Missile Track by two boxes, one by one. See Governing Manual.

END WAR/ASTERISK RESULT

Even if the War ended with no clear winner/loser, some benefits/penalties may still be awarded.

US War: You may choose to reject peace and continue the War. If you do, -2 Public Approval and -1 World Opinion of the US. Skip the rest of this section.

If the Conflict Status was on the Stalemate box (or in either blue/black box adjacent to Stalemate for non-Combined Air/Ground Wars), skip the rest of this section.

If the Conflict Status was on or beyond the "Forces Winning" box on the US side, +1 Public Approval. Otherwise, -1 Public Approval.

Ally or US-Supported War: If the Conflict Status was on or beyond the "Forces Winning" box on the Ally or US-Supported side, +1 Public Approval and place a +1 AP counter on the Ally. Otherwise, -1 Public Approval, worsen the Ally relationship by one level and place a -1 AP counter on the Ally.

If Russia or China was involved: If the Conflict Status was on or beyond the "Forces Winning" box on Russia or China side, place one of that Peer's Influence counter in the War's Region.

If Iran, DPRK or a Rogue State was involved: If the Conflict Status was on or beyond the "Forces Winning" box on Iran, DPRK or the Rogue State side, place a +1 AP counter on them.

ADDITIONAL WAR CLEANUP

- If the War was governed by a Conflict Track
  - □ Reset that Conflict Track 2 boxes before the War box (box #2 for the Israel/Neighbors Conflict Track, box #3 for all others).
  - □ Reset the Relative Strength to its "At Start" box. Then, move it one box in favor of the side who won the war (if any).
- Remove the War counter from the War's Region and every counter from the War that just ended from the War Tracks Sideboard and the game board.

SUMMARY OF NORMAL/HARDER CHANGES

Normal

- **Adversaries/Peers have +1 strength.**
- **If US Naval Forces Training & Tech is at 1-3, then each unit in a CVBG Deployment Zone can only contribute to one Region.**
- **Heavy units count as 3 strength instead of printed value in a Guerilla War.**

Harder

- **Adversaries/Peers have +3 strength.**
- **If US Naval Forces Training & Tech is at 1-4, then each unit in a CVBG Deployment Zone can only contribute to one Region.**
- **Heavy units count as 3 strength instead of printed value in a Guerilla War.**

WM6 ENHANCE STRATEGIC CAPABILITIES

If US State of the Economy (SoE) is 5 or higher, roll for **TWO** different capabilities.

If US State of the Economy (SoE) is 4 or less, roll for **ONE** capability.

ALSO, if there are any **"DARPA/Rapid Capabilities"** counters on the Strategic Capabilities track, you get one roll for each (for the track the counter is on).

For each capability you choose to improve (and for any DARPA/RC counters), roll one d10 .

The SecDef Military Rating provides a -# DRM on any non-DARPA roll.

On a 1-5 result, or a 1-7 result for any attempts for the "DARPA/RC" counter, improve that capability by one box. Otherwise, there is no improvement.

Remove all DARPA/Rapid Capabilities counters, whether or not the track they were on was improved.

WM7 INTEL GATHERING

When you choose the Intel Gathering Ops Action (Action #2 from the **Master Military Actions Player Aid Card**), you are allowed to make TWO different Intel attempts in any world region (not CONUS) in order to identify and locate Terror Groups that are operating in map regions, move them to that region's Intel Track to begin tracking them, and eventually move them to the Targeting box of that track so that you can attack them with Raids (Targeting box only) or Drone Airstrikes (Locating or Target fixed boxes). You perform an Intel Gathering Op, as follows:

- Identify the Terror Group counter that is your target in the Region.
- Roll a d10 :
- Modify the die roll by -1 if there is a US Intel unit in the region and by -1 if the US has a Focused National Intelligence counter in the region.
  Modified rolls of 1-4 are successful. Move the target from the map portion of the region to the "Gathering" box of the Intel Track (if it was not already on the Intel Track) or (if it was already on the Intel Track) one box to the right on the Intel Track.
  Modified rolls of 5+ are failures. There is no negative impact of a failure; you've just used an Intel action to no good effect.

Your second Intel attempt of the action must be against a different Terror Group than the first, but it may be in any game region, not necessarily the same region as your first attempt.

This section of the World Charts contains all the charts that you will use to determine the results of Terror attacks, chaos, and the effects of past world events ("The Past is Prologue")

WT1 TERROR ACTS

TERROR ACTS PROCEDURE

- Increase the Regional Crises in every region containing 1+ Rogue State counters by one box.
- **Consolidation of networks.** In each Region where there are at least two Lvl 1 Terror Groups, remove two of them and replace with one Lvl 2 Terror Group. If the two Terror Groups are on the Intel Track of the Region, put the Lvl 2 Terror Group on the lower box of the two. If at least one of them is not on the Intel Track, put the Lvl 2 Terror Group in the Region.
  Example: if one Lvl 1 Terror Group was on Gathering and the other one was on Locating, the new Lvl 2 Terror Group would be placed in the Gathering box. If one Lvl 1 Terror Group is in the Gathering Box and the second is in the Region, the new Lvl 2 Terror Group is placed in the Region.
- Roll a d10 on the Terror Acts Table, below.

TERROR ACTS TABLE

DR (d10)	RESULTS
1-3	**New Terror Groups.** Roll for a random region and add a Lvl 1 Terror Group in it. Then do this again (both Terror Groups can end up in the same region).
4-7	**Terror Group Expands.** Increase the highest-level Terror Group on the board (decide randomly for ties) by one level. Create one new Lvl 1 Terror Group in a random region.
8+	**Surprise Terror Planning or Event.** Make a Homeland Security Check: **Pass:** Randomly draw one new Terrorism Event card from the Unused pile and add it to the Reshuffle pile. **Fail:** Randomly draw one Terrorism Event card from the Unused pile and immediately apply its event, just as if you'd drawn it this Turn.

DRMs: (+3 Max)
+1 Per level 3 or 4 Terror Group on the board

Then, if there is at least one Rogue State on the board, roll a d10:

1-4: Export to Eurozone. If there is a Lvl 1 or Lvl 2 Terror Group in the Eurozone, randomly increase one such Terror Group by one level. Otherwise, add one new Lvl 1 Terror Group to the Eurozone.

5-8: The United States. If there is a Lvl 1 or Lvl 2 Terror Group in CONUS, randomly increase one such Terror Group by one level. Otherwise, add one new Lvl 1 Terror Group to the CONUS.

9: Russia. Place one -1 AP counter on Russia.

10: China. Place one -1 AP counter on China.

WT2 CHAOS ACTS

CHAOS PROCEDURE

- Increase the Conflict Status Track for a random conflict by one box. If that causes War, set up the new War and make the initial War Progress Check (*see WM5, page 19 WCB*).
- Roll a d10:
  - **1-3:** Draw a new Cascading Event card from the Unused pile and apply the results listed under "C" on the Card just as if you had drawn it from the deck. Then place it in the "2" pile unless the card result directs otherwise.
  - **4-7:** Make an International Chaos roll (d10) on the International Chaos Table.
  - **8-10 Domestic Chaos.** Increase Domestic Crises by one box. Then roll a d6:

1-2: Congressional Leaders dismayed by your agenda. Roll another d6 and either: Randomly remove one Friend from Congress (1-3) or Draw a new Opponent in Congress (4-6).

3-4: Cabinet Issues. -1 Public Approval, add a "Worsening" counter to Cabinet Effectiveness. Then Roll once on the Cabinet Drama Table (D3) and apply results.

5-6: Nobody Loves Me, Everybody Hates Me... Unless your current Public Approval is 60% or higher (in which case no further effect): -1 RWC, -2 Public Approval, -1 AP and place one Tensions on POTUS/Cab. Priorities (6 to 1).

INTERNATIONAL CHAOS TABLE

DR (d10)	RESULTS
1-2	**Rogue Action: North Korea**. Activate North Korea like you would during an Allies and Rogues Activation (WA2).
3-4	**Rogue Action: Iran.** Activate Iran like you would during an Allies and Rogues Activation (WA1).
5-6	**Major Rift With An Ally**. Roll a d10 to determine Ally: **1.** Canada **2.** UK **3.** NATO **4.** Israel **5.** GS/SA **6.** India **7.** Japan **8.** ROK **9.** Australia **10.** Roll again and choose TWO Allies (ignore more 10s until you have rolled two different allies). Once you have identified the affected Ally (or Allies), adjust Ally Relations with them to "Estranged."
7-8	**Major Russian Destabilization Campaign in Eastern Europe.** Increase Regional Crises by two boxes in Eastern Europe and place a Russian Influence counter there.
9-10	**China Expands Island Building in South China Sea.** Increase Regional Crises by two boxes in Asia/Pacific and place a China Influence counter there.

WT3 THE PAST IS PROLOGUE: WORLD EVENTS

When you draw a Past is Prologue World Crisis, roll a d10 and immediately apply the results below.

ROLL (D10)	WHAT TO DO
1	**Ebola Outbreak in Central Africa**. +1 Regional Crises. If Stability is 6+, African nations band together to contain the outbreak. No further effect. If Stability 5 or less, African response is minimal. The UN calls for world help. You may choose to spend 2 APs to send massive US medical help to the region. If you spend the 2 APs, roll a d10: **1-5**: US leadership of world effort contains the outbreak. -1 Regional Crises. Add a "Trending Pro-US" counter to the Africa Alignment Track. +1 UN Goodwill counter. **6-9**: The outbreak is contained, but not before it spreads to neighboring countries and requires more time and effort to contain. Either spend one additional AP or place a Worsening counter on the Africa Alignment Track. **10**: This is a new strain of Ebola that initially confounds medical experts. You may spend 2 additional APs to lead world efforts to identify and treat the strain. If you don't spend the additional APs, place a Worsening counter on the Africa Alignment Track and lose one UN Goodwill (if none to lose, -1 to World Opinion of the US). Place a China Influence counter in Africa (they lead the world effort to identify and treat the virus). Roll a d6 and lose Public Approval equal to half the result (rounded up). If you don't spend the initial 2 APs, roll a d10 on the International Chaos Table (above), with a +5 DRM.

Contd

Result text continued on next page

Contd

2	**Unrest in Iran**. If there is a Sanctions counter or at least three Tensions counters on Iran AND Iran is not at war (otherwise ignore the rest of this event and instead place two Tensions counters on Iran): Massive street protests break out over government policies and lack of sufficient food and goods. +1 to Middle East Regional Crises + 2 Tensions on Iran. You may now spend up to 2 APs to provide both covert and public support to the demonstrators. The number of APs you spend is a –DRM to the ensuing die roll. If there is at least one Russia Influence counter in the Middle East, that is an additional +1 DRM. Roll a d10: **0 or less**: Iranian Army supports protestors, leads coup. New government institutes major change in Iranian foreign policy and reaches out to the west for help in stabilizing the country and rebuilding economic ties. New government renounces attacks on Israel and discontinues support for Hezbollah. Remove any Sanctions counters from Iran. In game-terms, Iran is no longer a Rogue nation seeking to destabilize the Middle East. Remove all "Iranian Influence" counters from the board, do not roll for Iran during its "Ally/Rogue" activation, and ignore any cards referencing any Iranian activity for the rest of the game. Ignore Iran's Conflict Tracks as there is no longer conflict with Israel, America, or the Gulf States/SA. Remove all Tensions on Iran and ignore all future references to adding or removing Tensions or Iranian Influence counters. Essentially, Iran is out of the game as a major player and is now treated like all the game's unnamed states that are represented by Unstable State counters and Civil Wars as instabilities occur. **1-7**: The government makes some concessions, while placing limits on public protests and arresting those who defy the new limits. Iran's focus on internal issues temporarily distracts them from external destabilization efforts. Decrease any two Lvl 1-3 Terror Groups in the Middle East by one level. **8+**: Iranian government evicts all foreign media, then launches vicious attacks on the protesters, killing thousands in the streets. Iran blames the US and Israel for starting and sustaining the protests, and vows to make both "The Great Satan" and "Little Satan" pay. Place a new "Iran Influence" counter in the Middle East. (See Page 32 GM.) If the US and/or Israel is involved in a war in the Middle East, add +1 strength to their opposition in each such war. +2 Tensions on Iran, Israel, and GS/SA.
3	**Pakistani-based rebel groups ally and make a united surge into Afghanistan.** +1 to Central/South Asia Regional Crises. **If Central/South Asia Stability 4 or less**: If there is a Rogue State in Central/South Asia, increase the Rogue State by one level. If there is no rogue state in Central/South Asia, place a Lvl 1 Rogue State there. +1 Regional Crises in Central/South Asia. **If Central/South Asia Stability 5 or 6**: If US has non-Special Ops, non-Intel forces in Central/South Asia, place two Lvl 2 Terror Groups in Central/South Asia. If not, place two Lvl 3 Terror Groups and an Unstable State counter in Central/South Asia. **If Central/South Asia Stability is 7 or more**: If US has non-Special Ops, non-Intel forces in Central/South Asia, place two Lvl 1 Terror Groups in Central /South Asia. If not, place two Lvl 2 Terror Groups in Central/South Asia.
4	**Ultra-Nationalist Movements Threaten the EU** **If Eurozone Stability is 6, 7 or 8**, the ultra-nationalist message gains little traction with the voters in most countries. +1 Regional Crises in the Eurozone. **If Eurozone Stability is 4 or 5**, nationalist movements gain enough influence to create serious "Brexit-type" movements in major European countries. +1 Regional Crises in both the Eurozone and Eastern Europe. You may now choose to spend up to 3 APs to counter nationalist influence and help stabilize the EU and NATO. If you do, the number of APs you spend is a -# DRM to the ensuing die roll. Roll a d10: **5 or less**: In several very near-run contests, key EU member countries reaffirm their commitment to the EU and NATO, though at a cost in time and diverted national resources. Place a "-1 AP" counter on NATO and "Worsening" counter on the Eurozone SoE Track. **6+**: Although nationalists are defeated in close votes across Europe, France votes to leave the EU. -1 to Eurozone Stability. Place a "Worsening" counter on the Eurozone SoE. Worsen the NATO Ally Relationship by one level and move the NATO/Russia Relative Strength one box in Russia's favor.

Result text continued on next page

Contd

Contd

4 contd	**If Eurozone Stability is 3**, nationalist movements prevail and the EU collapses, as Germany and France exit, leading to EU disintegration. -1 to Eurozone SoE and +2 to Eurozone and Eastern Europe Regional Crises. NATO remains for joint defense, but the "country first" commitments of its members weaken it and cause friction with the US. Move the NATO Ally Relationship to "Estranged" and move the NATO/Russia Relative Strength two boxes in Russia's favor. -1 to Alignment in both the Eurozone and Eastern Europe.
5	**Turkey's Government Moves Toward Dictatorship. Alliances in Question**. **If Eastern Europe Stability is 7 or higher, OR if there is no Russia Influence in either Eastern Europe or the Middle East**: +1 Regional Crises in Eastern Europe and the Middle East. +1 Tensions on NATO. Ignore the rest of this event. Otherwise, +1 Regional Crises in Eastern Europe and the Middle East. +1 Tensions on NATO. You may now choose to spend up to 3 APs to undermine the Turkish moves toward dictatorship and deeper ties with Russia. If you do, the number of APs you spend is a -# DRM to the ensuing die roll. +1 DRM if both Eastern Europe and the Middle East have at least one Russia Influence. Roll a d10: **0 or less**: US-supported Coup restores Turkish democracy and solidifies NATO's southeastern flank. Remove two NATO Tensions. If NATO ally relationship is worse than Very Close, improve it by one level. Place a "Trending Pro-US" counter on the Alignment Tracks in both Eastern Europe and the Middle East and move Russia's US Relations left one box. **1-7**: Turkey deepens ties with Moscow and increases purchases of Russian military hardware while retaining NATO membership. +1 Russia Influence in Eastern Europe. +2 Tensions on NATO. -1 Public Approval. Place "Trending Anti-US" counter on Russia's US Relations Track. **8-10**: Civil War in Turkey. +3 Tensions on NATO. +1 Regional Crises in both Eastern Europe and the Middle East. Place Civil War counter in Eastern Europe. +1 Russia Influence in Eastern Europe. Place "Trending Anti-US" counter on Russia's US Relations Track. **11+:** Turkey leaves NATO and deepens ties with Moscow. +1 to Russia's Relative Strength on Russia/NATO Conflict Track. +1 Russia Influence in Eastern Europe and the Middle East. Place a "Worsening" counter on Russia's US Relations track. -3 Public Approval. Decrease NATO Ally Relations by one level.
6	**Old Hatreds Fester in the Balkans.** **If Eastern Europe Stability is 5 or less and there is at least one Russia Influence in Eastern Europe**: If Serbia is already at war through card #136, reroll this result. Otherwise, Serbia goes to war with her Balkan neighbors, with Russian support. +2 to Regional Crises in E. Europe. Set up a Combined Air/Ground War, with Serbia/Russia (combine their strength) the attacker, and Surprise (to account for Russian Hybrid War attacks). Unless the current NATO ally relations is "Estranged," You MAY spend 3 APs to lead the NATO Article 5 defense of member nations Slovenia, Croatia, and Montenegro. If you do, -1 to Russia's US Relations Track and add up NATO's Strength as well as the strength of the US to the Balkan States Strength. If you do not spend the 3 APs to intervene, -1 to US Alignment in both Eurozone and Eastern Europe. **Otherwise, if Eastern Europe Stability is 5 or less or if Eastern Europe Stability is 6 or more and there is at least one Russia Influence in Eastern Europe:** cross-border raids and targeted ethnic and religious killings create chaos in the Balkans. Place a Civil War counter in Eastern Europe. +1 to Eastern Europe Regional Crises. **Otherwise**: UN and EU pressure and timely anti-terror action keeps a nervous peace. +1 to Regional Crises in Eastern Europe. **If there is War due to this event,** ignore Event #136 as long as the war is ongoing. Instead of usual "War Ends" results, if the war ends in Serbia/Russia victory, -1 to Russia's US Relations, -1 to Stability in Eastern Europe, +2 Russian Influence in Eastern Europe. If the war ends in Balkan States victory (with or without US/NATO help), -1 to Russia's US Relations, +1 to Eurozone Stability, -1 Russia Influence in Eastern Europe (if there's a Russian base, you may remove it and replace with 2 Influence). If the war ends in peace/stalemate, -1 to Russia's US Relations, +1 to Eastern Europe Regional Crises.

Result text continued on next page

Contd

Contd

7	**Joint Narco/Terror Groups Threaten Central American Governments.** **If Central America Stability is 7 or 8**, place one new Lvl 2 Terror Group in Central America. -1 to Central America Stability. +1 to Regional Crises. **If Central America Stability is 5 or 6**, place one Unstable State counter plus one new Lvl 3 Terror Group in Central America. -1 to Central American Stability. +1 to Regional Crises. **If Central America Stability is 4**, place one Unstable State counter plus one new Lvl 4 Terror Group in Central America. -1 to Central American Stability. +1 to Regional Crises. **If Central America Stability is 3,** place a Lvl 1 Rogue State and one Lvl 2 Terror Group in Central America. +2 To Regional Crises.
8	**China Build-up/Aggression.** China militarizes several more islands at the far reaches of the South China Sea, angering neighboring countries and infringing on their territorial claims. They also use their militarized fishing fleets to harass and intimidate local fishermen from Vietnam, Taiwan, the Philippines, and Indonesia. If China at Posture 1, increase to Posture 2 and place a "+1 AP" counter on China. Assess China's current influence in Asia/Pacific and then apply the listed game effects and responses: **3 or more China Influence:** Strong Chinese positions throughout the region stymie the response of the US and her allies, but the Chinese aggression hardens regional attitudes against them. Move China's Relations with the US counter one box left. If any US allies in Asia/Pacific are less than "Very Close," improve that Ally relationship by one level. Place a +1 AP counter on each of the three US allies in Asia/Pacific. Increase both the China/Japan and China/India Conflict Status Tracks by one box. **2 China Influence:** If all three US Allies in Asia/Pacific are Very Close, China's aggression backfires. Remove one China influence from the region and place a "+1 AP" counter on one Asia/Pacific Ally of your choice. Otherwise, roll a d10: **1-4**: Add one China Influence in Asia/Pacific and place a "Worsening" counter on China's Relations with the US Track. **5+**: Place a "Worsening" counter on China's Relations with the US Track. The US may perform an immediate Joint Action with any one ally in Asia/Pacific. **0 or 1 China Influence:** Roll a d10: **1-6:** Add one China Influence to Asia/Pacific and place a "Worsening" counter on China's Relations with the US Track. Place a "+1 AP" counter on two Asia/Pacific allies of your choice. The US may perform an immediate Joint Action with any one ally in Asia/Pacific. **7+:** China's aggression backfires. Remove one China influence from the region and place a "+1 AP" counter on one Asia/Pacific Ally of your choice.
9	**Wave of Extremism and Ultra-Nationalism hits South American Governments, Exacerbating Social/Political Divisions and National Rivalries**. **If South America Stability is 7 or 8**, place one Unstable State counter in South America. +1 to Regional Crises. -1 to Regional Stability. **If South America Stability is 5 or 6**, place two Unstable State counters plus one Lvl 2 Terror Group in South America. +1 to Regional Crises. -1 to Regional Stability. **If South America Stability is 4**, place two Unstable State counters plus one Civil War counter in South America. +1 to Regional Crises. -1 to Regional Stability. **If South America Stability is 3**, place one Lvl 2 Rogue State plus 1 Unstable State counter and one Civil War counter in South America. +2 to Regional Crises.
10	**Technological Leap/Black Swan** Roll a d10 to determine which Peer Competitor has made the leap: **1-4**= Russia **5+** = China Roll a d10 to identify the random Strategic Capability affected. Once determined, increase that Strategic Capability by three boxes for that nation.

COMBAT CHARTS

WCT1 WAR COMBAT TABLE

Combined Air/Ground War | Air/Missile War | Guerilla War

Die Roll	Less than 1:2	1:2	1:1	2:1	3:1	4:1 or More
1 or Less	No Move; 1 Attacker Loss	No Move; Both 1 Loss	1 Left; 1 Defender Loss	1 Left; 2 Defender Loss	2 Left; 2 Defender Loss	2 Left; 3 Defender Loss

8+	1 Right; 2 Attacker Loss	1 Right; Both 1 Loss	1 Right; Both 1 Loss *	No Move; Both 1 Loss *	No Move; Both 1 Loss	1 Left; Both 1 Loss

* = If one side has not won, Make Peace. End War. Both sides spent. (Ignore on Initial War Progress roll)

** = If one side has not won, after applying results, change Combined Air/Ground War to Guerilla War.

*** = Counterattack!
After applying potential moves and losses, if no side has won the War, swap the Attacker and the Defender and "mirror" the Conflict Status marker (e.g. if the marker was on the "Defending Forces Winning" box, place it on the "Attacking Forces Winning" box). See a before/after illustrated example on p.47 in the Governing Manual.

Split DRMs for DRM Charts Below: If the US, a US Ally or a US-Supported country is Attacking, use the value to the left of the slash. If the US, US Ally or US-Supported country is Defending, use the value to the right of the slash.

DRMs: Select the DRM chart that matches the Conflict Type, then apply any DRMs from that chart to the War Progress die roll.

COMBINED AIR/GROUND WAR DRMS (+4/-4 MAX)

Surprise for Attacker -1 (initial War Progress Roll only)

If US War and US FNI counter in region -1/+1

If US/Russia/China/Israel is Attacker -1

If US/Russia/China/Israel is Defender +1

If US War and there is a US Heavy Army counter in region -1/+1

If US War and there is a USAF counter in region -1/+1

If US, Ally or US-Supported War and the total of Russia/China's combined Influence in the Region is one or two +1/-1

If US, Ally or US-Supported War and the total of Russia/China's combined Influence in the Region is three or more +2/-2

If Russia/China/Iran/North Korea are involved in a War vs the US, a US Ally or a US-Supported Country and the Region's Regional Alignment is 6-7 (or 8) -1/+1 (-2/+2)

If US War and US Ground Forces Training & Tech Strategic Capability is >3 -1/+1

If US War and US Air Force Training and Tech Strategic Capability is >3 -1/+1

AIR/MISSILE WAR DRMS (+3/-3 MAX)

Surprise for Attacker -1 (initial War Progress Roll only)

If US War and US FNI counter in region -1/+1

If US War, per USAF counter in region -1/+1

If Israel is involved in the War -2/+2

If US, Ally or US-Supported War and Russia or China has a base in the region. +1/-1

If US War and US Air Force Training and Tech Strategic Capability is >3 -1/+1

GUERILLA WAR DRMS (+3/-3 MAX)

Automatic DRM to any Guerilla War Progress roll +2

If US War and US FNI counter in region -1/+1

If US War and both a US Spec Ops and Intel counter are in region -1/+1

If US War and both a US Light and USAF counter are in region -1/+1

If US, Ally or US-Supported War and the total of Russia/China's combined Influence in the Region is one or two: +1/-1

If US, Ally or US-Supported War and the total of Russia/China's combined Influence in the Region is three or more: +2/-2

IMPACT OF ROGUE STATE WMDs

If US or Russia is Attacking a game-created Rogue State that has acquired WMDs:

A natural (unmodified) roll of "1" (for US or Russia) = WMDs successfully destroyed, in addition to Combat Table result. Remove WMD Acquired counter from the Rogue State.

A natural (unmodified roll of "10" (for US) = Rogue State uses WMD on US Forces/Infrastructure**. Immediate Auto Loss for US Player.**

A natural (unmodified) roll of "10" (for Russia) = Rogue State uses WMD on Russian Forces/Infrastructure. Remove WMD Acquired counter from the Rogue State and roll a d10:

1-9: Russia responds with overwhelming force, including WMDs of its own. Move Russia immediately to Posture 2. (If already there, place TWO "+1 AP" markers on Russia.) War Ends. Instead of normal "War Ends" results, remove the Rogue State from the region and replace with one Lvl 2 Terror Group. Add a Russian Influence counter to the region.

10: Rogue WMD decapitates/disrupts Russian leadership to the extent that Russia withdraws in disarray and negotiates peace. War Ends. Instead of normal "War Ends" results, no Change to the Rogue State. Remove one Russia Influence counter from the region. Place a "-1 AP" counter on Russia.
